

COVID-19 TEST KIT

The first FDA EUA approved saliva test

We have teamed up with RUCDR Infinite Biologics and Spectrum Solutions to offer medically-supervised telehealth testing in your home for the novel coronavirus, SARS-CoV-2, the virus that causes COVID-19.

ABOUT THIS TEST

The physician-ordered, provider-supervised and physician-reported saliva collection test for COVID-19, which has the same effectiveness as the swab test, is performed under the supervision of a Vault healthcare provider through a video telehealth visit eliminating the risk of person-to-person exposure to the virus.

Please note: This is not an antibody test. This test is designed to determine if you currently are infected with COVID-19 and have the potential to infect others.

- **Physician-ordered test kit shipped to you**
- **Uses a saliva sample**
- **Practitioner-supervised sample collection (over [Zoom](#) video call)**
- **Overnight shipping to lab**
- **Results 48-72 hours after arrival at lab**
- **May be reimbursable by insurance under the Cares Act**

WHAT THE RESULTS MEAN

	Positive	Negative	Inconclusive*
Test Result	Test Result	Test Result	Test Result
Am I infected?	YES	NO	POSSIBLY
Can I infect others?	YES	NO	POSSIBLY
Should I consider getting another test if I DON'T have symptoms?	NO	NO	YES

	Positive	Negative	Inconclusive*
Test Result	Test Result	Test Result	Test Result
Should I consider getting another test if I DO have symptoms?	NO	YES	YES

* An inconclusive test result means that the test could not definitively determine whether you are infected with the SARS-CoV-2 virus. Only in 2% of cases are test results inconclusive.

HOW IT WORKS

Practitioner-supervised saliva collection over a video visit.

Prepaid shipping and testing designed to reduce physical contact.

Results 48-72 hours after arrival of your sample at the lab.

1. ORDER YOUR KIT

Describe your symptoms, risk factors and pertinent health history online. Enter shipping and billing details for your test.

2. GET YOUR KIT

The box will be delivered to your address via overnight delivery. Open the box and look for the blue instruction card. Read it carefully. DO NOT OPEN THE TEST TUBE PACKAGE until you are instructed on your [Zoom](#) video call)

3. Prepare for your supervised saliva-collection Supervised by a medical practitioner over a [Zoom](#) call

After your kit arrives, you'll log into our site and connect with a Vault medical practitioner over a [Zoom](#) video call. The practitioner will guide you through collecting saliva in the tube. Once connected, the whole process takes just a few minutes.

4. SHIP THE KIT BACK (USING PROVIDED SHIPPING LABEL)

Your kit includes everything you need to send your sample back via prepaid expedited shipping.

5. GET YOUR RESULTS

You will get a report of your results (positive, negative, or inconclusive) 48-72 hours after your sample arrives at the lab.
