<p>Opinion polls in recent decades have shown that high percentages of people believe:</p> <ul style="list-style-type: none"> We are not alone in the universe We have been visited by people or some kind of intelligent life forms from other planets The government is not telling the truth about extraterrestrial UFOs and visitors <p>These and other polls also show that people with more education and intelligence are more likely to believe UFOs are real and from other planets when compared to people with <i>less</i> education and intelligence.</p> <p>Following is a sample of polls done on the general public, pilots, astronomers, youths, women, and others. They reinforce the more than 500 "whistle-blowers" who have offered to testify under oath to Congress about the government cover-up and that we have definitely been visited by intelligent beings not from Earth.</p> <p>More complete results from these polls, and many other polls, can be viewed at the web sites noted at the bottom right.</p>	<p>United States Branch of Mensa International - 1976 Survey of Mensa members Source: National Enquirer, June 1, 1976</p> <p>64% think UFOs are spaceships from other planets</p> <p>51% believe UFOs are carrying passengers who are studying our behavior</p>	<p>Womanpoll National Survey - 1978 Source: St. Louis Globe-Democrat, July 22-23, 1978</p> <p>Does other intelligent life exist in the universe besides on Earth?</p> <p>All women: · Yes 50% No 30%</p> <p>College education: · Yes 56% No 27%</p> <p>High school education: · Yes 50% No 29%</p> <p>Grade school education: · Yes 38% No 37%</p>

This is despite over 60 years of lies, denial, and ridicule, by the government and mainstream news media.</p> <p>There is more respectful news coverage now. Why? Because the news media see these poll results and are less likely to insult and ridicule the majority of their audience. This is helping to end the CIA's truth embargo and disinformation campaign on UFOs as described in page two.</p>
