

## Final Version [Approved for petition 3.7.19]

### Title and text of a proposed ordinance for “Protecting Extraordinary Technology”

*Be it enacted by the People of the City and County of Denver*

The Code of the City and County of Denver is amended by the addition of a new article to read:

#### ARTICLE \_\_\_\_. PROTECTING EXTRAORDINARY TECHNOLOGY

**Sec. \_\_\_\_.** **Definitions.** As used in this article.

(1) *Extraordinary technology* means areas of innovation including, without limitation:

- A. Industry forming/influencing inventions that are pioneering in scope
- B. A motor or power plant, which has exceptionally high, non-polluting, non-hazardous, and sustained energy output relative to input
- C. Inventions of demonstrated efficacy, (i.e. produces an intended result of value and usefulness), even if they appear to violate the predominant scientific understanding of physics or chemistry (e.g. antigravity, faster than the speed of light, accessing dark energy, etc.)
- D. Room temperature superconductivity
- E. Anti-global warming devices or any other device operating at the global scale
- F. Methods or compositions for prolonging life or preventing aging
- G. Prevention or curing of diseases previously considered impossible to prevent or cure, such as cancer, AIDS, HIV infection, dementia, Alzheimer’s, etc.)
- H. Treatments to enhance intelligence
- I. Devices for communicating with sentient departed spirits

(2) *Patent* means a property right granted by the City and County of Denver to an inventor to exclude others from making, using, offering for sale, or selling the invention throughout the City and County of Denver or importing the invention into the City and County of Denver, for a limited time in exchange for limited public disclosure of the invention when the patent is granted.

**Sec. \_\_\_\_.** **Declaration of findings and intent.**

The People of the City and County of Denver hereby declare that the unfair, if not illegal, suppression by the U.S. Patent and Trademark Office (USPTO) of cures for diseases, cleaner energy and other extraordinary technologies, has resulted in unnecessary suffering and death to tens of millions of people and vast environmental destruction throughout the world. Examples of suppressed technologies are viewable in the *Gallery of Clean Energy Inventions*.

It is urgent and necessary to protect “extraordinary technology” research, development, marketing, use, intellectual property rights, inventors and access to a fair and open market. This will affordably ensure human and environmental health, energy security and independence, job creation and economic strength, and significantly reduce deadly air pollution, and fires and floods related to climate change.

The non-fiction book, *Tesla & me*, and groundbreaking research by the SoulPhone Foundation, reveal that the ability to communicate with sentient departed spirits has been validated within the fields of medicine, military, law (criminal and copyright), and science. For example, the sentient spirits of legendary inventors, Nikola Tesla, Thomas Edison and Steve Jobs, are still actively inventing breakthrough extraordinary technologies.

The possibly illegal secret USPTO Sensitive Application Warning System (SAWS), used during 1994-2015, delayed targeted patent applications indefinitely without explanation to patent applicants. Targeted applications included:  
[Source: USPTO]

- “Anti-Global Warming devices or any other device operating at the global scale”

- “Motor, Power plant, or other device which is self-sustaining (perpetual motion) or appears to violate the laws of chemistry or physics
- “Claiming prevention or curing of diseases which were previously considered impossible to prevent or cure.”
- “Applications which would potentially generate unwanted media coverage (i.e., news, blogs, forums)”

The SAWS program so secret that it was not mentioned on the patent office website nor in the detailed 1,500-page Manual of Patenting Examination Procedure. A Denver intellectual property legal firm exposed SAWS through the news media in December 2014. The USPTO claimed in March 2015 that it would end SAWS. However, statutes and other rules still allow the USPTO to unfairly, if not illegally, target and delay patent applications indefinitely.

Federal preemption of lower courts regarding federally issued patents does not prohibit any U.S. county or state from issuing patents, within their jurisdictions, for technologies that the USPTO has chosen to unfairly or illegally obstruct or delay.

Creating a safer haven for extraordinary technologies could make Denver a robust epicenter of “next big things”.

[Certain information in this declaration of findings stems from documented and historical facts included in the following: *SAWS-FOIA-Response*, *POWER UP* – by Jeff Peckman, *Tesla & me* – by Didier van Cauwelaert, the *SoulPhone™ Foundation*, *Hidden Energy* – by Jeane Manning and Susan Manewich, and *The Gallery of Clean Energy Inventions*.]

**Sec. \_\_\_\_ . Protecting Extraordinary Technology**

1. The City and County of Denver shall provide expedited issuance of patents for extraordinary technology, giving highest priority, without being a prerequisite, to categories of patent applications that were, or continue to be, unfairly or illegally obstructed or delayed by the U.S. Patent and Trademark Office. Funding for processing patent applications and issuing patents shall be obtained through application fees, or otherwise, as determined by the City and County of Denver.

2. The City and County of Denver shall affirm through a public proclamation and general policy, the legality of research, development, manufacturing, marketing, sale, possession, and use of extraordinary technology, regardless of patenting status.

**Sec. \_\_\_\_ . Implementation and Enforcement.**

By the effective date, as set forth below, the City and County of Denver shall use all administrative rules, policies and procedures necessary for the proper and effective implementation and enforcement of the provisions of this article.

**Sec. \_\_\_\_ . Effective date.**

This article shall be effective immediately from and after the date of its enactment.

**Sec. \_\_\_\_ . Severability.**

Should any one (1) or more provisions of this article be determined to be illegal or unenforceable, all other provisions nevertheless shall remain effective.

The ballot title for the Initiated Ordinance shall be as follows: [Draft – Not approved as of March 7, 2019]

*“Shall the voters for the City and County of Denver adopt an Initiated Ordinance, and in connection therewith, require the city to issue patent protection for extraordinary technologies, and affirm the legality of research, development, manufacturing, marketing, sale, possession, and use of extraordinary technologies?”* Yes\_\_\_No\_\_\_
