NEW WATER WELL REGISTRATION

(This form can also be used for Replacement and Grandfathered Wells)

GRANDFATHERED WELL

- A well drilled prior to February 6, 2003 provided that the use of water is within the District.
- Registration is voluntary and is to be done by February 6, 2004. After February 6, 2004, proof of ownership prior to February 6, 2003 is required to receive grandfathered status.

REPLACEMENT WELL

- Cannot change the existing well use or capacity.
- A replacement well for an existing well must be drilled within 30 feet of the existing well but not nearer the property line than 50 feet provided that the original well was grandfathered.
- Replacement of an existing permitted well requires a new permit.

EXEMPT WELL

- Must be registered prior to drilling of the new well.
- A well for domestic use incapable of producing more than 25,000 gallons per day.
- A well on 10 acres or more used to water livestock or poultry and incapable of producing more than 25,000 gallons per day.
- A well to be used solely to supply water for a rig that is actively engaged in oil or gas exploration. This exemption does not apply to the use of groundwater for the purpose of fracturing an oil or gas well or for the use of groundwater in any application during the production of an oil or gas well. Groundwater use for fracturing an oil or gas well or groundwater used in any way for the production of an oil or gas well is subject to the permitting rules of the District. The registration of an exempt water well used solely to supply water for a rig that is actively engaged in drilling or exploration operations may not provide a well suitable (permitting rules) for production, such as a fracturing operation, which requires a permit. Potential future use of the well requiring an operating permit needs to be considered and addressed prior to the drilling of the supply well.
- A new exempt well must be 135 feet from the property line.
- See Rule 14.2 for well location in relation to sewage systems and other contamination.

*** There are exemptions to these rules, please speak to a GCGCD representative with any questions.**

NON-EXEMPT WELL

- Must have a drilling permit followed by an operating permit.
- Well spacing is based on permitted flow.
- Maximum well production is dependent on zone location of well within County.
- Subject to minimum screening depths.
