

Injector Diffuser

For 1" and 1 1/2" Scale Steam Locomotives

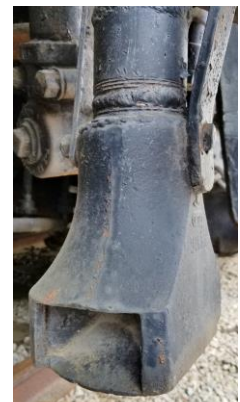

By the **Extreme Steam** division of

Keim Steam Pump

Injectors were often fitted with a diffuser on the overflow pipe to disperse hot steam and water in the event a boiler check valve or steam valve stuck open. The diffuser shown was scaled from the full size unit that features three separate cast outlet channels.

This kit consists of a cast brass investment casting and a threaded brass pipe connector.

Scale	Body Thread	Pipe Nipple Thread	To Fit Injector	Part Number
3/4"	10-40	-	-	D1040
1"	1/4-40	1/4-40	Eccentric Engineer Small Scales	D2540
1.5"	5/16-40	5/16-40	Eccentric Engineer Intermediate	D31240
1.5"	3/8-32	3/8-32	Eccentric Engineer Standard	D37532
1.5"	3/8-32	3/8-56	Superscale	D37556
