Industrial Controls

Starts August 2026

Tuition and Fees Covered

About the Program

The Industrial Controls Program equips one with key skills to monitor and maintain automated manufacturing systems. Focusing on industrial controls, programmable logic controllers (PLCs), and troubleshooting, the program provides hands-on training with industry-standard equipment.

Arkansas State University-Newport & CREST

Eight-Week Courses

Our eight-week format reduces the typical 16-week semester into two sessions.

This format allows students to focus on one course at a time and take courses in sequence, promoting success.

Hybrid Classes

In-person learning + online flexibility – Meet on campus to perform lab exercises and complete the rest of the work online.

Courses & Electives

Industrial Electricity I
Programmable Logic Controllers I
Industrial Motor Controls I
Industrial Electricity II
Industrial Process Controls
Temperature Process and Controls
Level and Flow Process Control
Industrial Robotics
Programmable Logic Controllers II
Industrial Motor Controls II
Introduction to Networking

Take one course, four hours a week every eight weeks -or- build a customized schedule to meet your needs

2+2 Transfer Program

The transfer program makes the transition from ASUN to A-State simple. The goal is to give one a clear path to complete a four-year degree at A-State. We work closely on degree requirements and transfer of credits so one can focus less on red tape and more on achieving academic goals.

Benefits

- Most courses are four hours per week in lab setting
- Program can be tailored to employer and employee needs
- The program can be completed in one to three years

More time to balance work, life, and school.

How is this Different?

- No employer contracts
- Program can be offered to any employee on a volunteer basis
- No employer reporting requirements
