

Perennial Bloomers

Tips:

- ✓ For the most color all year plant perennials that will bloom in each season throughout each bed.
- ✓ Dead-head your flowers to ensure longer lasting color.
- ✓ Drip systems or misting heads will help protect fragile flowers.
- ✓ Putting mulch around perennials will add to nutrient value and retain moisture.
- ✓ Support tall perennials so they do not break in the wind.
- ✓ Buddy plant shade lovers into a sunny bed. (Protect them with a larger plant)
- ✓ Divide perennials every 3-4 years to increase vigor and add more plants to your garden.
- ✓ Fertilize with a high phosphate fertilizer to beef up your blossoms.
- ✓ Prune back to the ground in the fall after they have lost their color.

Spring
