

An introduction to the Integrative Enneagram

What is the Enneagram?

The Integrative Enneagram serves as a powerful tool for self-discovery, revealing the underlying patterns that subconsciously drive and shape our personalities. By bringing these motivating forces into consciousness, it allows us to transcend our habitual responses, cultivating the development of more fulfilling, healthier ways of being.

Engaging with this model encourages individuals to assume responsibility for their own behavior and personal growth, nurturing a deeper understanding of the reasons behind their actions and reactions.

The Enneagram is a dynamic framework that presents nine distinct Types, providing profound insights for individuals, groups, and collective entities. With its three Centers of Intelligence, nine Enneagram Types, Wings, 27 Subtypes, and more, this model unfolds an intricate roadmap for personal development. It does not box people in but rather opens a pathway to self-discovery and greater personal awareness.

This transformative framework articulates the journey of personal integration in a deeply meaningful way. It unveils

the unique essence of each individual and their unique path. It does not only reveal what holds us back, it also illuminates the path towards strength and liberation. This journey helps us connect with our higher selves, fostering an empowering sense of personal growth and self-understanding.

DISCOVER AND EXPLORE INDIVIDUAL STRENGTHS THROUGH THE ENNEAGRAM

The Integrative Enneagram is a strengths-based framework and an invitation to a journey of discovery into the inner workings of your personality type. The Integrative Enneagram can help you discover the strengths attributed to your type, navigate your own development and assist others to tap into their innate gifts as well!

Each Enneagram type has natural strengths which arise from its internal worldview or perspective. By discovering and exploring your type, you can develop your understanding and let go of habitual patterns of behaviour that sub-consciously drive and motivate you to act in certain ways, opening you up to your own ***inherent strengths and gifts.***
