Auto Mechanic Students on Practical

Home Economics Students and teacher in class

Economics Students and teacher in class

It came by so quick, the two years vocational training school at the Gipo Vocational Training Institute will be having its first graduation on December 16, 2017. 30 prospective graduates from five trade areas: Agriculture, Building Construction, Auto Mechanics, Electricity, and Home Economics. The goal of the school is to empower young people with vocational skills, making them productive, self-supportive and sustainable. Part of this goal is to provide the graduates with starter kit at the graduation to enable them to set up their own shops and business, to enable them earn decent wages to support themselves and their family.

The students are eager to do the needle and thread patterns even during break, the home economics students never forget their lesson so as to be the first to finish and get to sewing on the machines but unfortunately their school has no sewing mechanics (Big challenge for teachers and students).

Gipo Vocational Training Institute; Agriculture practical teacher desires to remain on campus during the Covid-19 lockdown to grow vegetables, cassava, and rice for sustainability for the school. He is harvesting his first crops cucumber and tomatoes for m
