

Teach Tech KENTUCKY

WHO IS ELIGIBLE?

Recruiting teachers of record in grades 3–12 in Kentucky schools

Participating teachers may teach in any subject area. STEM teachers may find the content more applicable to their standards and curriculum but all interested teachers are welcome.

You will have an opportunity to review the micro-credential content and assess relevance to your curriculum prior to committing to participation.

Teachers must have principal and superintendent permission to participate.

Participating teachers will agree to:

- ✓ Attend an online, facilitated workshop to review content of the 6 micro-credentials and select sequence for completion aligned to priority standards and curriculum.
- ✓ Complete 6 micro-credentials to learn core concepts of computer science (CS) and computational thinking (CT).
- ✓ Design and teach CT and CS lessons integrated into their curriculum. Attend regular online coaching sessions and Virtual Learning Community meetings.
- ✓ Host a family engagement activity focused on CS and CT - with a micro-grant (up to \$600) for materials to each participating teacher.
