CAPABILITIES STATEMENT

AI-Powered Policy Reasoning & Federal Decision Support

COMPANY SNAPSHOT

Company: CJD Global Defense Contracting LLC

UEI / DUNS: 105814253

Location: Virginia, United States

SAM.gov: Active | DDTC Registered | ITAR Compliant

EIN: 83-2954387

Primary NAICS: 517410 | Business Type: Small Business

CORE CAPABILITY STATEMENT

CJD Global delivers AI-powered policy reasoning and decision support for federal agencies operating in complex, multi-layered policy environments. Our flagship product — the Policy Reasoning Layer (PRL) — is a practitioner-built AI platform that ingests overlapping policy frameworks (collective bargaining agreements, HR policy manuals, agency orders, and leadership directives) and delivers citation-grounded, governance-ready guidance for federal managers and supervisors.

PRL was born from 18 years of direct FAA operational experience. It was not designed in a lab — it was built by a federal supervisor who experienced the daily friction of navigating PASS CBA articles, HRPM directives, and FAA Orders simultaneously. The result is a system that produces outputs federal HR professionals and legal teams have validated as accurate, traceable, and operationally useful.

Citation-Grounded Outputs

WHAT PRL DELIVERS

- ▶ **Ingests multiple overlapping federal policy documents (CBAs, HR manuals, agency orders, leadership memos) into a unified reasoning engine.**
- ▶ Produces citation-grounded policy guidance — every output traces directly to the source document and clause.
- ▶ Reduces managerial decision friction in policy-dense federal organizations, enabling faster and more defensible decisions.
- ▶ Covers scheduling, leave management, HR compliance, workforce conduct, operational continuity, and supervisor-employee relations.
- ▶ Deployable as a Discord-based bot (live: AOT PRL BOT#8011) or via web interface at prl-engine-production.up.railway.app.
- ▶ Architecture designed for agency-specific customization — policy libraries can be updated, expanded, or scoped to specific regulatory frameworks.

DEPLOYMENT ROADMAP

Phase 1	Validation Complete — FAA Technical Operations 25+ artifacts validated. 12 management functions covered. Live proof-of-concept deployed in ServiceNow-compatible format.
Phase 2	Agency Expansion — FAA NAS, DOT, VA, DHS PRL Policy Advisor extended to additional federal agencies. Agentic workflows introduced for proactive compliance monitoring.
Phase 3	National Infrastructure — Enterprise Licensing PRL Ops platform deployed across multiple NAS facilities. Platform licensing + operational intelligence tier. Federal AI best practice standard.

WHY CJD GLOBAL FOR AI POLICY REASONING

- ▶ **Practitioner-built, not consultant-designed — the founder is a federal supervisor with 18 years inside the system PRL was built to support.**
- ▶ MIT-trained in Applied Agentic AI for Organizational Transformation (AAOT) and Digital Transformation in the AI Age — academic rigor behind operational intuition.
- ▶ Active FAA ethics disclosure filed, demonstrating commitment to regulatory compliance and responsible AI deployment.
- ▶ Technical partnership with Arsen (Prism Reasoning Group) — full-stack implementation capability at prl-engine-production.up.railway.app.
- ▶ Designed for federal procurement pathways — SAM.gov active, DDTC registered, small business set-aside eligible.
