Business Type: Small Business

SAM.gov: Active | DDTC Registered | ITAR Compliant

EIN: 83-2954387

Primary NAICS: 517410 – Satellite
Telecommunications

Website: globalcorajohndefense.com

CORE CAPABILITY STATEMENT

CJD Global Defense Contracting LLC delivers mission-critical federal telecommunications infrastructure, systems integration, and network reliability services to U.S. government agencies and prime contractors. With 25+ years of combined telecommunications and federal operations experience — including 18 years of direct FAA service — we provide secure, compliant, and enterprise-grade communications solutions for defense and civilian agencies that cannot afford downtime.

Our founder and principal brings practitioner-level credibility from direct service inside the FAA's Potomac TRACON Communications (PCT) unit, where he has held a Supervisory Airway Transportation Systems Specialist (Band J) role. This lived operational experience is the foundation of every engagement.

CORE COMPETENCIES

Telecommunications Infrastructure

- ▶ Federal telecom systems installation & activation
- ▶ Network infrastructure buildout
- ▶ FAA-FTI deployment & integration experience
- ▶ Nationwide project execution

Federal Systems Operations

- ▶ Air traffic and radar systems support
- ▶ Electronic systems operations & sustainment
- ▶ Technical team leadership & workforce management
- ▶ Safety, compliance & mission continuity

Network Services & Reliability

- ▶ High-availability network design & diagnostics
- ▶ Enterprise & government network operations
- ▶ Mission-critical communications systems
- ▶ Telecommunications circuit & infrastructure audits

Technical Leadership & Project Execution

- ▶ Supervisory oversight of technical specialist teams
- ▶ Hiring panels, staff development & IPI nominations
- ▶ Incident management & emergency coordination
- ▶ Perle MCR chassis & RDVS rack integration projects

WHY CJD GLOBAL

- ▶ **18 years of direct FAA operational experience — not advisory, not consulting. We have operated inside the National Airspace System.**
- ▶ Supervisory-level credibility: workforce management, compliance oversight, and mission continuity in a safety-of-flight environment.
- ▶ 25+ years in telecommunications spanning commercial carriers (Qwest/CenturyLink) through federal mission-critical systems.
- ▶ Licensed UAS (drone) operator with working knowledge of FAA airspace regulatory frameworks.
- ▶ MIT-trained in Digital Transformation & Agentic AI — bringing next-generation systems thinking to traditional federal telecom challenges.
- ▶ DDTC Registered and ITAR Compliant, enabling future export-control-sensitive engagements.
