Central Control Panel - Product Catalogue

All-in-One Control Center on HMI Panel

What if you could have a simple way to centrally control multiple appliances at your home, the surrounding temperature, and activate preset scenes based on selected preferences, all of which were just through a single tap? This is exactly what NSPanel works for you: from lights, cooler, heater to electric windows and curtains, the new world of home automation will make your smart home life better!

Dual-Channel Switch for Better Appliances Control

Although you can control multiple devices on NSPanel, the device is also equipped with two independent physical buttons, allowing you to control two devices you use most often independently, as what you did previously!
