

Carbon Facial FAQs

What you need to know

Am I suitable for a Carbon Facial treatment?

Carbon Facials offer a gentler, yet highly effective, alternative to harsh chemical peels and are therefore an ideal treatment for most skin types. Carbon Facials are popular with men and women of all ages seeking solutions for acne and acne scarring, pigmentation and the signs of ageing. Your individual needs will be discussed during your consultation.

How many treatments do I need?

Although you will notice glowing results after just 1 treatment, a course of around 6 treatments is recommended for long-lasting anti-ageing effects, as well as clear, healthy skin for months to come.

How often can I get a Carbon Facial?

Treatments are spaced 4 weeks apart (i.e. once a month), in order to allow the skin regenerative process of the facial to take full effect.

What can I expect on the day of my facial?

Carbon Facials are performed on clean, makeup-free skin. The treatment takes around 30-40 minutes, and you are free to get on with your day as usual afterwards. Some skin redness may occur, but this will subside within a few hours. Following treatment, it is advised to apply SPF sunscreen for protection, and you may also apply makeup if necessary.

Is it safe?

Yes, Carbon Facials are safe. A thorough skin consultation will be performed prior to the facial to ensure the treatment is adequately matched to your skin's needs.

Is it painful?

While you will feel a warm and tingly sensation during treatment, it is not painful. Most clients comfortably undergo treatment without the need for topical numbing creams.

Carbon Facials leave the skin instantly glowing and you are free to get on with your day as usual.

Carbon Facial treatments are:

Fast
Non-Invasive
Highly Effective

Carbon Facials

for radiant, beautiful skin

instant results | no pain | no downtime

*Marketed by TheGlobalBeautyGroup

Beautify your skin with Carbon Facials

Carbon Facials are an advanced skin rejuvenation treatment also commonly known as the “China Doll Facial”, or “Hollywood Facial”. By combining cutting-edge aesthetic technology with a special carbon cream, Carbon Facials work to reduce skin imperfections such as enlarged pores, pigmentation, acne scarring and fine lines, while offering an instantaneous glow to your complexion.

No pain. No downtime. No fuss.

Do you lead a busy lifestyle? Carbon Facials are the perfect skin corrective treatment for those who wish to achieve a smoother, clearer, more radiant skin tone without having to spend too much time in the treatment room. The facial takes just 40 minutes, is painless, and best of all — there's no post-treatment downtime, so you are free to get on with your daily activities as normal following your session.

Glowing results after just 1 treatment

As Carbon Facials 'peel' off the outer layer of dead skin cells, your skin is instantly exfoliated and purified, resulting in a noticeably more radiant complexion after just 1 treatment. This is why Carbon Facials are a popular choice for celebrities and public personalities, as they can achieve an instantly healthy and luminous glow before a big event or special project where their skin has to look and feel its best.

What to expect in a Carbon Facial

Skin is thoroughly cleansed to remove dirt and excess oil.

Special carbon cream is applied to the skin and allowed to absorb for 10 minutes.

A laser handpiece is then passed over the treatment area 3 times to remove the carbon along with the dead skin cells of the epidermal layer.

Skin is gently cleansed again and a SPF sunscreen is applied for protection.
