

DIRECTIONS FOR USE: Always wear approved eye protection and protective gloves.

SUGGESTED USE RATE FOR SENSIPRO™ BLUE GRANULES AS A SPRAY PATTERN INDICATOR:

Usage rates begin at 1 - 2 ounces by weight per acre (50 gallons water) or 1/4 - 1/2 cup; 60 - 120 grams per hectare (450 liters water). Determine number of acres/hectares being treated. Fill spray tank 1/3 full with water and REMOVE STRAINER BASKET. With continual tank agitation, slowly add predetermined SensiPro™ Blue Granules first. Allow to disperse, and then add other actives and water as needed. Spot test and adjust colorant prior to full scale spraying. Taller grass may require higher rates. Retain usage rate records for future reference.

SUGGESTED USE RATE FOR SENSIPRO™ BLUE GRANULES AS A POND/LAKE COLORANT:

Usage rates begin at 15 - 20 ounces by weight per acre up to 6 feet deep (3 cups per acre) or 1 - 1.4 kilograms per hectare up to 2 meters deep. From an upwind location, broadcast granules at multiple locations of water. For best results, use 1/2 cup increments. Allow up to 24 hours for full dispersion.

Adjust rates as desired. Longevity of color and application frequency varies depending on rainfall and pond conditions. Rates will be affected by water quality and turbidity. Retain usage rate records for future reference.

Water may be used for irrigation, aquaculture and recreational purposes including swimming and fishing once dispersed. Treated water is safe for fish and wildlife. Will not stain or harm waterfowl, fish or livestock. Do not apply to water that may be used for human consumption. Do not apply to streams, rivers or bodies of water not under the control of the user.

PRECAUTIONARY STATEMENT: Avoid contact with skin, eyes or clothing. In case of contact immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists. If swallowed: Call a poison control center or doctor immediately for treatment advice.

STORAGE & DISPOSAL: Store in original container in a cool, dry place. Triple rinse, then offer for recycling or dispose of in a sanitary landfill or by other procedures approved by state & local authorities.
