PRESIDENT MESSAGE

At our company, we take pride in providing top-notch services for construction, building & temporary facilities, pipeline, operation & maintenance, as well as telecom civil and fiber work, . We understand that our clients rely on us to deliver quality workmanship, timely completion, and excellent customer service.

Hadi Saleh Al Marri
President

WE ALL HAVE DREAMS; WE MAKE YOUR DREAMS COME TRUE BY BUILDING IT FOR YOU.

As we continue to grow and expand our services, we remain committed to our core values of safety, integrity, and professionalism. Our team of skilled professionals is dedicated to ensuring that every project is completed to the highest standards of quality and excellence.

We believe that our success will be built on the relationships we will develop with our clients. We will be grateful for your trust in us, and we look forward to serving you with the quality level of dedication and commitment that may earned us a reputation as an excellent services provider in this sector.

Thank you for taking the time to read this message. Should you require any additional information or if you would like to discuss potential collaborations, please do not hesitate to get in touch.

Thank you!

C.E.O MESSAGE

As CEO of the Foundation Founding of Excellence General and Contracting company, I have seen us grow from a small contractor to a large reputable construction firm. This progression reflects not only our hard work and perseverance but also our unwavering commitment to meeting and exceeding

Our company is built on four core pillars: Ethics, Professionalism, Commitment, and Quality which continue to define every aspect of our operations.

Guided by these values, we have successfully undertaken projects across all major sectors of the construction industry, including Industrial, Civil Infrastructure, Mechanical Works, Cross-Country Pipeline Construction, Plant Piping, and Electrical & Instrumentation projects throughout various Saudi Aramco projects in different areas in the Kingdom.

Our route to success has been highly dependent on our competent, dedicated and highly skilled team of professionals. Their expertise and loyalty have made us a strong and trusted force in the market. *We strongly believe in our philosophy of upholding client satisfaction.

Our long-term goal is to expand our operations to more areas of Saudi Arabia in order to increase our business operations and opportunities. With committed staff and *application of advanced project management techniques, we are confident that we have a recipe for sustainable growth and achievement. We are very proud of our employees, whose dedication, talent and loyalty made Foundation Founding of Excellence General and Contracting an important force in Construction market.

Thankyou!

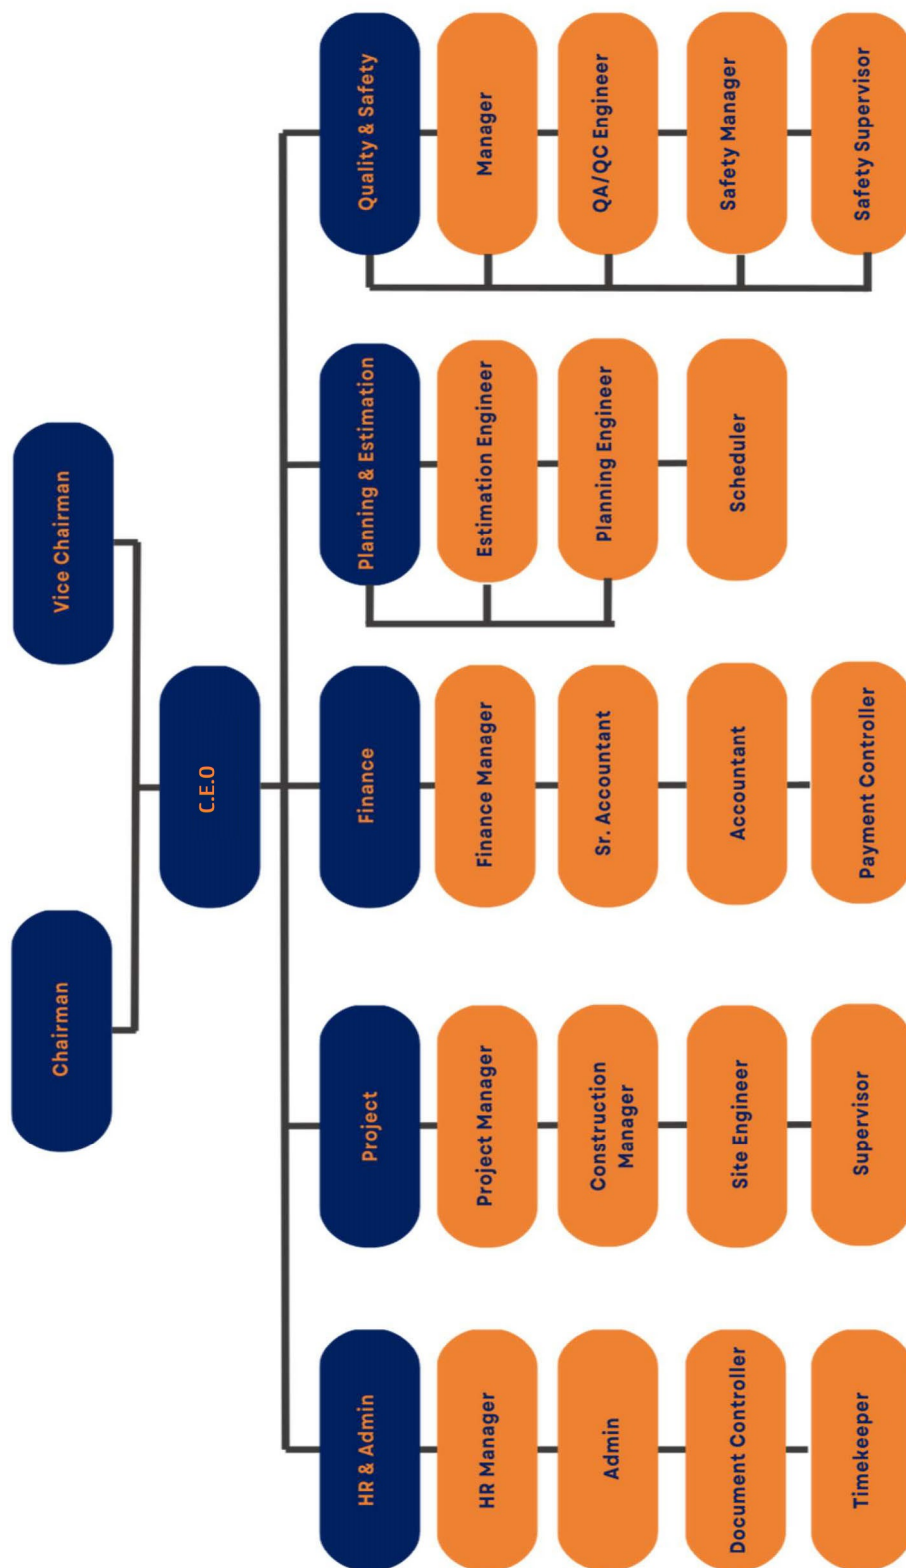

Alex. K. Walekhwa
Chief Executive Officer

FFOE

COMPANY ORGANIZATION CHART

FFOE

ABOUT COMPANY

Foundation Founding Of Excellence General Contracting established in 2007. The company business policy is based primarily on ensuring that customers' demands are met to the best of our ability. We pride ourselves on delivering exceptional value for the money by consistently going above and beyond in every aspect of our work. Our primary focus moving forward is to ensure the best interest of both our current and future potential clients.

At FFOE, we take pride in our extensive expertise in all aspects of construction. Our team of engineers, supervisors, foreman and skilled worker work collaboratively to ensure the highest standards of quality and following safety standards in every project we undertake. From concept to completion, we meticulously plan and execute construction activities to meet and exceed our clients' expectations.

We firmly believe that surpassing expectations is key to maintaining long-lasting relationships with our valued clients. By prioritising the highest standards of quality, professionalism, and efficiency, we are confident in our ability to continually exceed your expectations.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

Construction activities encompass a wide range of tasks that lay the groundwork for creating remarkable structures. From the initial earthwork and excavation to the meticulous concrete and asphalt work, each step plays a vital role in building a solid foundation. At FFOE, we take pride in our expertise in these construction activities, ensuring precision, quality, and durability in every project we undertake.

- ❖ **Earthwork and Excavation:** The journey of constructing any structure begins with earthwork and excavation. Skilled operators and modern machinery are deployed to clear the site, level the ground, and prepare it for the subsequent stages. Excavation involves carefully digging trenches, basements, and other required areas, ensuring accurate dimensions and proper drainage. Our team excels at understanding the soil conditions, implementing appropriate techniques, and efficiently managing the earthwork process.
- ❖ **Concrete Work:** Concrete work forms the backbone of many construction projects. We ensure that the concrete mixture is of the highest quality, adhering to industry standards and specifications. With a meticulous eye for detail, we guarantee precise formwork, accurate reinforcement placement, and impeccable finishing, resulting in structurally sound and aesthetically pleasing elements.
- ❖ **Foundation Construction:** The foundation is the backbone of any structure, providing stability and support. Our team specializes in constructing strong and reliable foundations by following the design, specification, and standards of each project. We leverage our team to ensure proper installation and execution as per the drawing.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

The process of building construction involves various activities that collectively lead to the successful completion of a structure. From the initial planning and design stages to the final construction and finishing touches, each step requires meticulous attention to detail and expertise.

One of the primary activities in building construction is site preparation, which involves clearing the area, excavating the land, and ensuring a level foundation. This step sets the groundwork for the entire project and requires skilled workers and heavy machinery.

Following site preparation, the next significant activity is structural construction. This involves erecting the framework of the building, including the walls, floors, and roof. Various materials such as steel, concrete, and timber are skilfully assembled to construct a solid and durable structure.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

From the earliest stages of earthwork and excavation to the critical tasks of concrete and asphalt work, and the foundational elements that provide stability, each construction activity plays a vital role in bringing structures to life. At FFOE, we combine our experience, skilled workforce, and commitment to quality to excel in these essential construction activities. We recognize the importance of precision, durability, and adherence to industry standards in every project we undertake. With our expertise, attention to detail, and unwavering dedication, we ensure that every construction activity we undertake contributes to the creation of exceptional structures that stand tall for generations to come.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

Precast work at a construction site involves manufacturing concrete elements off-site and transporting them to the construction site for installation. This method offers faster construction, better quality control, and reduced on-site labor. Once on-site, the precast elements are connected and finished to form a complete structure. This approach is popular for its efficiency and flexibility in meeting specific project requirements.

- Lighting Pole Foundation
- Pipe Rack Foundation
- Fence Post
- Bollards
- Manhole
- Catch Basin

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

Fence installation with posts involves the process of setting up a fence by securing posts into the ground and attaching fencing materials to create a barrier. Here are the details of the process:

1. **Site Preparation:** Before installation, the area where the fence will be placed is cleared of debris and marked for the placement of fence posts.
2. **Post Installation:** Holes are dug at regular intervals along the fence line, and the posts are set into the ground. The posts are secured in place using concrete footings or other anchoring methods to ensure stability and longevity.
3. **Attachment of Fencing Materials:** Once the posts are installed, the chosen fencing materials, such as panels, rails, or mesh, are attached to the posts to create the desired barrier.
4. **Gate Installation:** If gates are part of the fence design, they are installed using hinges and latches to allow for secure entry and exit.
5. **Finishing and Inspection:** Any necessary finishing work, such as trimming, painting, or applying protective coatings, is carried out. The completed fence may be subject to inspection to ensure it meets safety and regulatory standards.

Fence installation with posts is a fundamental aspect of creating a secure perimeter and controlling access at construction sites, residential properties, and commercial facilities.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

At FFOE, we provide the essential, high-quality structural and finishing trades that form the backbone of every successful construction project. Our skilled craftsmen specialize in transforming architectural plans into solid, durable, and aesthetically pleasing realities. We are committed to precision and excellence in every phase of the building process.

Our Core Building Services:

1. **Precision Masonry & Hollow Block Work**, We lay the foundation for durability and structural integrity. Our expertise encompasses the construction of robust walls, partitions, and structures using a variety of materials, including concrete hollow blocks and traditional brick. We ensure:

- **Structural Soundness:** Perfectly aligned, plumb, and level walls that meet or exceed building codes.
- **Thermal & Acoustic Efficiency:** Expert installation of hollow blocks to enhance energy efficiency and sound insulation within buildings.
- **Reinforced Construction:** Proper integration of reinforcement as per structural design requirements for added strength and stability.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

2. Superior Plastering & Rendering, A flawless finish begins with a perfect base. Our plastering services create smooth, even, and resilient surfaces ready for final decoration. We specialize in:

- **Internal Plastering:** Applying high-quality gypsum and cement plasters to achieve perfectly smooth walls and ceilings.
- **External Rendering:** Durable, weather-resistant cement-based coatings that protect the building envelope and provide a pristine base for paint or cladding.

3. Expert Finishing & Architectural Detailing, The final touches define the space. Our finishing work reflects our commitment to craftsmanship and attention to detail, ensuring a polished and professional end-result.

- **Tile Installation:** Precise laying of ceramic, porcelain, and natural stone tiles for floors, walls, and bathrooms.
- **Painting & Decoration:** Impeccable application of paints, textures, and coatings using advanced techniques for a flawless, long-lasting finish.
- **Minor Architectural Concrete Work:** Construction of minor concrete elements with clean, sharp lines and a high-quality formwork finish.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

Road and pavement works involve the construction, repair, maintenance of highways, streets, and pedestrian walkways. Here are the details of these works:

1. **Earthwork and Grading:** The construction site is prepared through earthwork, which involves excavation, grading, and compaction to create a stable foundation for the road or pavement.
2. **Subbase and Base Construction:** Layers of aggregate material are laid down to form the subbase and base layers, providing further support and stability for the road or pavement structure.
3. **Paving:** The chosen paving material, such as asphalt, reinforced concrete, is laid on top of the base layer and compacted to create a smooth and durable surface.
4. **Drainage Installation:** Proper drainage systems, including gutters, curbs, and stormwater management structures, are installed to prevent water accumulation and maintain the integrity of the road or pavement.
8. **Quality Control and Inspection:** Throughout the construction process, quality control measures and inspections are carried out to ensure the road or pavement meets design specifications and safety standards.

ABOUT CONSTRUCTION/BUILDING/PIPELINE WORK

Firstly, it is crucial to conduct a thorough survey of the project site to assess the feasibility and identify any potential obstacles. This is helping us to determine the location for the installation of the pipelines and the access for the required equipment to the location while considering projects standards and safety factors.

Our team develop a detailed construction plan with precise timelines and milestones. This plan will outline the sequence of activities involved in laying the pipelines, such as excavation, trenching, and backfilling. Handling of pipe and execution of joints depends on the type of pipe and project specification are attended by the teams. Effective management is essential to ensure the project progresses smoothly.

Furthermore, we also prioritize the safety of our team members and all safety standards of the project. Adequate safety measures, including regular safety training and supervision, we have implemented to minimize potential hazards and accidents.

ABOUT TEMPORARY FACILITIES WORK

We also specialize in temporary facilities services. This includes the installation, maintenance, and dismantling of portable cabins and other temporary structures. One recent project involved the dismantle of a portable cabin at Haradh & Hawiyah Field Gas Compression Project and its transportation and installation at Tanajib Gas Plant Project, Marjan area.

Our team of highly skilled professionals is dedicated to delivering exceptional results, and we take pride in our ability to provide customized solutions that meet the unique needs of each of our clients. We have the expertise and resources to ensure that every project is completed on time, within budget, and to the highest standards of quality.

At FFOE, we understand the importance of staying up-to-date with the latest technologies and trends in the industry. That's why we invest in state-of-the-art equipment and tools, as well as ongoing training and development for our team members. This enables us to provide our clients with cutting-edge solutions that are both efficient and cost-effective.

PROJECT SAFETY & QUALITY POLICY

We are also committed to safety, and we take every precaution to ensure that our work sites are secure and free from hazards. Our team members undergo extensive safety training and follow strict protocols to ensure that every project is completed without incident.

Safety is a top priority for our company when it comes to construction. We understand the importance of creating a safe work environment for our team members and ensuring that our clients' projects are completed without incident.

To achieve this, we have implemented strict safety protocols and procedures that our team members follow at all times. This includes regular safety training, hazard assessments, and the use of personal protective equipment (PPE) on job sites.

PROJECT SAFETY & QUALITY POLICY

One of the most important aspects of safety in construction and our other activities is proper planning. Before any work begins, we conduct a thorough risk assessment to identify potential hazards and develop a plan to mitigate them. This includes ensuring that all equipment is in good working order, that the site is secure, and that all necessary permits and approvals have been obtained.

We also prioritize communication and collaboration when it comes to safety. Our team members are encouraged to speak up if they notice any potential hazards or unsafe practices, and we work closely with our clients to ensure that everyone involved in the project is aware of the safety protocols in place.

In addition to these precautions, we also regularly review and update our safety policies and procedures to ensure that we are staying up-to-date with the latest industry standards and best practices.

Overall, safety is an integral part of our company culture, and we are committed to ensuring that every project we undertake is completed safely and without incident. By prioritizing safety, we can provide our clients with the peace of mind they need to know that their projects are in good hands.

PROJECT SAFETY & QUALITY POLICY

**SAFETY
FIRST**

The management bases its role in maintaining and promoting the quality policy and objectives of the organization, increasing awareness, motivation, and involvement.

It focuses on project requirements and applies appropriate processes to satisfy clients and other interest parties' expectations. It ensures the effectiveness of the key business processes and the effectiveness and efficiency of management, special and support processes by making available appropriate and necessary resources, deciding on actions regarding policy, strategy, and objectives, and deciding on actions for improvement.

Activities are identified within processes that interact and interrelate to yield the final results as per the requirements yet respect environmental and safety aspects. Human resources are assigned the responsibility of the activities that are measured for effectiveness.

The management evaluates the system through audits, reviews, and self-assessment. These determine the extent to which the system's requirements are fulfilled, contribute to the engineering initiatives, and drive continuous progress towards business excellence.

Our Safety records bare minimum incidence at sites as we follow stringent HSE rules and regulations.

We impart necessary on-the-job training and regular training to the staff to ensure quality at work.

Saudi Aramco Reg. Approval letter

Saudi Aramco E-Reference No. 0007384

Registration Approval Letter

October 01, 2023

Attention : FOUNDATION FOUNDING OF EXCELLENCE EST. FOR CONTRACTING

CR Number : 2256035822

Supplier Type: Service Provider Only

Country : Saudi Arabia

We are pleased to inform you that FOUNDATION FOUNDING OF EXCELLENCE EST. FOR CONTRACTING is now registered in the Saudi Aramco Supplier Management System under Vendor Code No. 10057547, provided your company continues to meet all relevant Saudi Arabian and Saudi Aramco standards.

This registration, however, should not be construed as a commitment by Saudi Aramco to procure from you. Being registered as a supplier only grants your company the opportunity, along with other registered sources, to respond to requests for submitting proposals in accordance with Saudi Aramco's established policies and procedures. All procurement instruments including but not limited to service contracts, purchase agreements, or purchase orders will be issued based on the name and address included in your commercial registration (CR), as stated in your Supplier Registration.

Saudi Aramco wishes to remind you that being recognized as a supplier carries with it serious obligations and responsibilities to act in a legal and ethical manner. We wish to remind you of the Saudi Aramco Supplier Code of Conduct (SCOC) which you acknowledged. Failure to abide by the principles set forth in the SCOC can result in adverse actions being taken by Saudi Aramco against you including suspension of you as a supplier. Saudi Aramco also expects each of its suppliers to satisfy each of the requirements of any procurement instrument which might be placed and to act responsibly and reliably as a supply chain supplier.

Material Suppliers should apply for Saudi Aramco Supplier Portal access by forwarding a request to portal-registration@aramco.com. The Supplier Portal is the main electronic business tool used between Saudi Aramco and its suppliers and serves to improve the flow and accuracy of key supply chain information.

For further information or assistance please contact the Saudi Aramco Supplier Help Desk by forwarding a request to SupplierHelpDesk@aramco.com or via the unified call center 800-115-1168 for In-Kingdom suppliers or +966 (11) 290-8950 for Out-of-Kingdom suppliers.

Moamar Khazal Al Usaimi, Supervisor
Supplier Registration Unit
Supplier Relationship Management Div

It is the responsibility of the supplier to update Saudi Aramco Supplier Registration Profile through Ariba for the following:

1. Change of Name / Commercial Registration Number / Address / Owner(s)
2. Any change of the supplier location
3. Discontinue supply of approved commodities (9C OMs and 9C ATS)

This is an electronically generated letter by Saudi Aramco. To verify Supplier approval status, please contact Supplier Help Desk at supplierhelpdesk@aramco.com
