

What is it and how does it work?

It consists of applying a cold laser to the face and applying coconut or avocado water, hyaluronic acid, and rosehip extract; Previously individualized by the patient's own DNA-tRNA, under strict allergy control using a skin test prior to the actual therapy.

In multiple treated patients, blood circulation has been observed to rapidly improve, as the elasticity of veins, arteries, and capillaries returns to normal.

These new activations stimulate natural collagen production, resulting in more elastic and firmer skin, without the introduction of laboratory-manufactured collagen biochemicals.

Benefits

Immediate 30-minute rejuvenation: Rejuvenates the skin and activates microcirculation and the production of the patient's own collagen.

Lifting effect: Tightens and tones the skin, producing an instant lifting effect in 30 minutes; Induces blood circulation to near-normal levels: Stimulates proper and faster blood flow in the skin.

Considerations:

1. No contraindications:
2. Professional consultation: It is important to consult a specialist before starting treatment so that they can evaluate whether it is suitable for your skin type.
