

Testimonials:

PATRICK – Gillam, MB

We have installed around 20 of these kits on various types of housing here in Gillam, MB. Since we installed them we have not had the stack on any building freeze over. Some of the places would freeze up weekly all winter long as the temp here for months on end is -30 to -50, on top of that we have strong winds and blowing snow almost daily. We will continue to install these on our commercial and residential builds as needed as they have proven to work. The kits have saved us money as well as safety by not having to access the steep roofs in the wind, snow, and ice that builds up. **GREAT PRODUCT!!!**

BRUCE – Winnipeg, MB

My home has a vent that faces north on a second story that is next to impossible to reach in the winter. Every year when the temperature dropped to about -20 the stack would freeze up and it was a constant battle filling the traps of sink and bath every time you flushed the toilet. I have installed the no frost vent this past fall, and with the temperatures this winter in Manitoba, I have not had a problem. Great Invention, strongly recommended!

NO FROST VENTING

NO FROST VENTING PLUMBING VENT STACK KIT

No Frost Venting offers an affordable solution for your frozen plumbing vent stack problems.

Eliminates:

- Frozen plumbing vent stacks
- Unhealthy sewer gases, stinking up your home or business
- Dangerous trips to your roof top in -20°F weather

www.nofrostventing.com

Finally a solution to frosted blocked plumbing vents!

Does someone have to dangerously get up on the roof once or multiple times to manually clear the frost that has blocked your plumbing vent(s)?

Do you hear gurgling noise from your drains, EG: toilets, sinks or showers?

Are you smelling a bad odor in your home or business, in the winter?

This is a sure sign that you need to clear the frost from the vent(s) on the roof! These blocked vents can cause very serious health issues. We have a patent pending, proven, tested and 100% guaranteed solution and is very simple to install.

This kit will keep the plumbing vents, frost free for many, many winters to come.

Plumbing Vent without our kit
