Guitar Riff 2X

**It was late, I was chilled down to the bone
I was lost (and) I never felt so alone
Heard a sound I never heard before
It was fear that struck me to the core
There I was where the wind didn't know my name
Don't go where the wind don't know your name**

Instrumental Verse

You might hear it near the ocean's summer breeze
You could feel it in the middle of the pourin' rain
Then again in an arid open plain
But don't go where the wind doesn't know your name
Don't go where the wind doesn't know your name**
