

Soil Test Options

As ryegrass and wheat harvest is on its way, now is a great time to think about soil sampling behind the combine. Soil sampling prior to fall tillage produces a more consistent 0-6" sample core along with an indication of the amount of nitrate available for next year's crop.

Recommended Crop Options

Small Grain: N, P, K, pH, salts, sulfur, chloride, copper.....\$26.00

Alfalfa: P,K, pH, salts ,sulfur, zinc, boron,% organic matter.....\$27.10

Soybean-Northern Region: N,P,K, pH, salts, sulfur, carbonates.....\$24.35

Canola/Sunflower: N,P,K, pH, salts, sulfur.....\$22.60

Option A: N,P,K, pH, salts, sulfur, zinc, % organic matter.....\$29.00

Option B: N,P,K, pH, salts.....\$17.15

Option F Complete Analysis: N,P,K, pH, salts, sulfur, zinc, calcium,
magnesium, sodium, CEC, % base saturation, iron, copper,
manganese, boron chloride, % organic matter, carbonates
(1Depth).....\$41.20
(2 Depths).....\$52.50

In addition to the above prices, NRC will charge \$60 per sample for our services and GPS spot sampling. Have a great and safe harvest!!
