

“OLD SCHOOL”, L.L.C.

Criminal Defense Investigations: Forensic Interview & Narrative Analysis

Neuro-Investigative Linguistics Protocol™ (NILP™) is a proprietary forensic interview and narrative-analysis system engineered specifically for Texas criminal-defense practice. Designed by Old School LLC, NILP™ provides attorneys access to a system that is structured with a legally aligned methodology that develops a clear, high-integrity analysis of statements. NILP™ delivers a depth of clarity that traditional interviews cannot match.

Its multi-domain framework provides defense attorneys with an understanding of exactly where a client’s narrative is strong, where clarification is needed, and how the event aligns with statutory elements, defensive theory, and evidentiary burdens under Texas law.

Because NILP™ is a **defense-centered system**—not adapted from law-enforcement techniques—it supports the attorney’s core mission: protecting the client, uncovering truthful detail, and preparing for cross-examination with confidence. All proprietary methods remain fully confidential and protected trade secrets of Old School LLC, while attorneys receive clear, court-ready reports that enhance strategy without revealing any component of the methodology.

NILP™ is positioned to become a **preferred tool for serious criminal-defense teams** seeking accuracy, clarity, and forensic-grade narrative integrity.
