NFT WHITEPAPER

INTRODUCTION

In the rapidly evolving digital landscape, the emergence of Non-Fungible Tokens (NFTs) has sparked a revolutionary shift in how we perceive and interact with digital assets. With their ability to represent provable ownership, uniqueness, and scarcity, NFTs have unlocked endless possibilities for creators and collectors alike. In this context, we are thrilled to introduce our groundbreaking NFT project that aims to bring a new dimension to the world of collectibles, ZPUNKS!

Zpunks is a 3D animated collection of 1,000 unique collectible characters inspired by crypto punks. (900 humans, 50 apes, 35 zombies, 10 aliens, 4 bots, and 1 Bitcoin punk)
Each specie has different attributes and rarity levels.

The value of these 1000 unique collectibles lies in their scarcity and the inherent exclusivity they represent. Each collectible will be minted as an individual NFT, cryptographically signed, and permanently recorded on the blockchain. This ensures the immutability of ownership records, guaranteeing the authenticity and provenance of each piece.

ZPunks NFT is not just any 3D animated NFT project. Our aim is to push the technology boundary of decentralized blockchain and NFT by building utilities for our lovely NFTs, in which owners of ZPunks get rewarded through these utilities for just holding their NFT.

ZPunks NFT holders will get the biggest portion of ZPunk Token airdrop, a percentage of all profit made from ZPunks NFT sales for life, special discounts on ZPunks online store, the eligibility to enter special giveaways, the ability to stake their NFT, and will have the right to decide the future of the project.

ROADMAP

ZPUNKS Roadmap

Q2
23

- Start of the project
- Launching the website | Discord | Twitter | Instagram
- Launching the project on rarible.com on polygon
- Minting begins
- Minting 10 Zpunks
- Minting 20 Zpunks
- Grow our community | Reaching 100 Discord members
- Reaching at least two holders

Q4
23

- Reaching at least 50 holders
- Minting 100 Zpunks (10%)
- Launching ZPT presale
- Launching ZPT on Pancakeswap
- Reaching 5000 Discord members
- ZPT airdrop to Zpunks holders
- Social media campaign
- Influencer campaign

Q2
24

- Reaching 250 holders
- Minting 500 Zpunks (50%)
- Listing ZPT on centralized exchanges
- Launching Zpunks online store

Q4
24

- Reaching 750 holders
- Minting all 1000 ZPunks
- Zpunk Holders will start receiving special NFTs created by Cryptofy
- Zpunks holders and the community will decide the future of the project

Q3
23

- Reaching at least 20 holders
- Token ZPT (zpunk token) creation on binance smart chain
- ZPT whitepaper release
- Minting 50 Zpunks
- Influencer campaign
- Social media campaign
- Reaching 1000 discord members

Q1
24

- Reaching at least 100 holders
- Minting 250 Zpunks (25%)
- Zpunks holders will start receiving profit % from ZPunks sales
- Social media campaign
- Influencer campaign

Q3
24

- Reaching 500 holders
- Minting 750 ZPunks (75%)
- Hosting giveaways to ZPunks holders
- Staking

25

TO THE MOON

HOW TO OWN A ZPUNK NFT

To hold, buy, or create NFTs, you need a cryptocurrency wallet. One of the best wallets available is the Meta Mask wallet. After wallet installation, you need to deposit enough funds to collect the desired NFT.

To transact with cryptocurrencies or NFTs on Rarible or anywhere else, you need to connect your wallet to log in.

Zpunks NFTs are available to buy on Rarible: <https://rarible.com/zpunks/items>

Some of the wallets connect options on Rarible include MetaMask, Rainbow, Coinbase, Temple, Blocto, Portis, Trust, and others. You can simply click on connect wallet, scan the QR code with your wallet, and sign in to connect.

From the Rarible.com homepage, hover over the "Explore" tab and select the Polygon blockchain, then type Zpunks in the search bar, and click on Zpunks.

Once you have found the item you wish to purchase, hover over the item and click "Buy Now", and then sign the transaction that follows.

The purchased NFT will be in your wallet you can see it by adding the contract address and token ID.

You can find an easy tutorial on Google or a video on Youtube on how to do all of these steps.

PHASE 1: MINTING START AND BUILD THE COMMUNITY

MINTING

The value of these 1000 unique collectibles lies in their scarcity and the inherent exclusivity they represent. Each collectible will be minted as an individual NFT, cryptographically signed, and permanently recorded on the blockchain. This ensures the immutability of ownership records, guaranteeing the authenticity and provenance of each piece. All NFTs will be designed, rendered, created, and minted manually one by one on Rarible.com.

Q2 2023 | 20 Zpunks NFTs will be minted (2%)

Q3 2023 | 50 Zpunks NFTs will be minted (5%)

Q4 2023 | 100 Zpunks NFTs will be minted (10%)

Q1 2024 | 250 Zpunks NFTs will be minted (25%)

Q2 2024 | 500 Zpunks NFTs will be minted (50%)

Q3 2024 | 750 Zpunks NFTs will be minted (75%)

Q4 2024 | 1000 Zpunks NFTs will be minted (100%)

SALE STRATEGY

Not all listed or minted NFTs will be available for sale once minted. More NFTs will be available to buy as the floor price increase. With every increase in floor price, an already minted NFT will be available to buy.

BUILD THE COMMUNITY

Establishing a strong NFT community is essential for the success and longevity of the Zpunk project. A vibrant and engaged community can fuel growth, foster collaboration, and contribute to the overall value of the Zpunk NFT ecosystem. Here are some strategies we will use to establish a strong NFT community:

Clear Communication Channels: we will create dedicated communication channels such as Discord servers, Telegram groups, or community forums where members can interact, share ideas, and ask questions. Will encourage open and transparent communication to build trust and create a sense of belonging.

Will engage with our community: Will actively participate in the community by regularly posting updates, sharing insights, and initiating discussions. Respond promptly to questions and feedback, showing that we value and appreciate community members' contributions.

Will do community Events and Contests: Organize community events, such as art competitions, giveaways, or auctions, to encourage participation and showcase the talent within our community. These events can generate excitement, attract new members, and incentivize existing members to actively engage.

Will search for Collaboration Opportunities: Facilitate collaboration opportunities among community members, such as artist partnerships, cross-promotions, or joint projects. Encourage the sharing of skills, resources, and ideas, fostering a collaborative and supportive environment.

Exclusive Benefits for Community Members: Will offer exclusive benefits to our community members, such as early access to new releases, limited edition NFT drops, or discounted prices. These incentives create a sense of exclusivity and reward community members for their loyalty and support.

Community Governance: Empower the community by allowing them to participate in decision-making processes through voting or governance mechanisms. Giving community members a voice in shaping the future direction of the project fosters a sense of ownership and strengthens their commitment to its success.

Education and Resources: Will provide educational resources, tutorials, and guides to help our community members understand the intricacies of NFTs, blockchain technology, and the benefits of participating in your ecosystem. This knowledge-sharing will empower them to make informed decisions and actively contribute to the community.

Spotlight Community Members: Highlight the achievements, contributions, and milestones of our community members. This recognition not only motivates and inspires others but also strengthens the bond within the community.

Regular Updates and Transparency: This will keep the community informed about project developments, milestones, and future plans. Regularly share progress reports, roadmaps, and project updates to build trust, maintain transparency, and keep our community members engaged and excited about the project's growth.

Feedback and Iteration: We will actively seek feedback from our community members and iterate based on their suggestions. We really value our member's opinions and are committed to continuously improving the project based on our community input.

PHASE 2: BUILD THE UTILITIES

Zpunks NFT focuses on providing added value for our holders through Utilities.

Zpunk Token

Zpunk Token will be the first utility to be introduced as the currency in the Zpunks project. It will be used to reward Zpunks NFT holders, tip a mod or members for their good work or contribution and swap for other tokens on decentralized exchanges, and trade on centralized exchanges.

Zpunk Token is not only a utility token but also a governance token of the ZPunks Project, the more Zpunk Tokens you have, the more authority and influence you have for future roadmap and features.

Staking and Rewards: holders can lock their tokens for a specific period to earn rewards. These rewards can be in the form of additional tokens, access to exclusive events, early access to new releases, or other incentives, encouraging token holders to actively engage and contribute to the ecosystem.

Royalties: Token holders will be the first to have the ability to buy new collection NFTs created later at the cheapest price.

Utility in Partner Ecosystems: partnerships or integrations with other projects or platforms where token holders can be used as a utility token. This expands the utility of the token beyond the Zpunks ecosystem, creating additional use cases and potential for adoption.

Zpunk Token will be also the main currency used to shop on Zpunks online store.

PHASE 3: DECIDE THE FUTURE OF THE PROJECT

All Zpunks NFT and token holders will have the ability to decide the future of the project, and the main target is to add more utilities for our lovely Zpunks NFTs.

One of the future decisions can be to build the Zpunks metaverse where Zpunks owners can come to interact with each other and feel as real as possible instead of chatting on Discord. Members can build a virtual Zpunks world together and transact using Zpunks to buy goods and services in the ZPunks Metaverse. Holders can use their ZPunks NFT as a key to enter the ZPunks Metaverse. They can be anyone they want to be behind their ZPunks avatar once they enter the Metaverse. Even Zpunk Token holders can access the Zpunk Metaverse by paying a fee with their tokens.

Another possible decision can be to create a Zpunks game. NFT games offer unique opportunities for players to truly own their in-game assets, participate in player-driven economies, engage with vibrant communities, and explore the potential of blockchain technology in gaming. These advantages contribute to a more immersive, rewarding, and dynamic gaming experience that sets NFT games apart from traditional games.

And much more!
