## shelving summary

the modular design of **biblomodel's** steel shelving is based on the suspension of individual components from free-standing, single or double-face uprights or wall strips. All shelving components adjust vertically in one inch increments. the width of **biblomodel's** componentry is based on 36" section. All of the modules and some of the more common componentry are available in 30" and 39".

the componentry depths are offered in various dimensions that consist of 8", 9", 10", 11", 12" and 15 3/4". The free-standing shelving is available in the following heights: 42", 48", 54", 60", 66", 72", 78", 84" and 90", which are produced with a 1 3/16" x 2 3/8" steel tube.

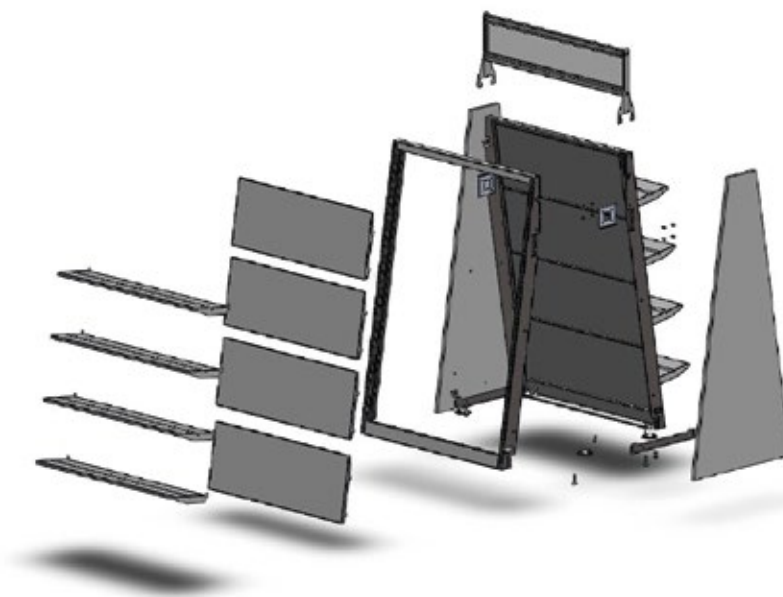

the shelving is constructed by connecting an upright with two crossbars per section. A third crossbar can be added to the section, when the shelving exceeds 66" high.

the modular construction and the various components of the **biblomodel** shelving system, ensures a wealth of options!

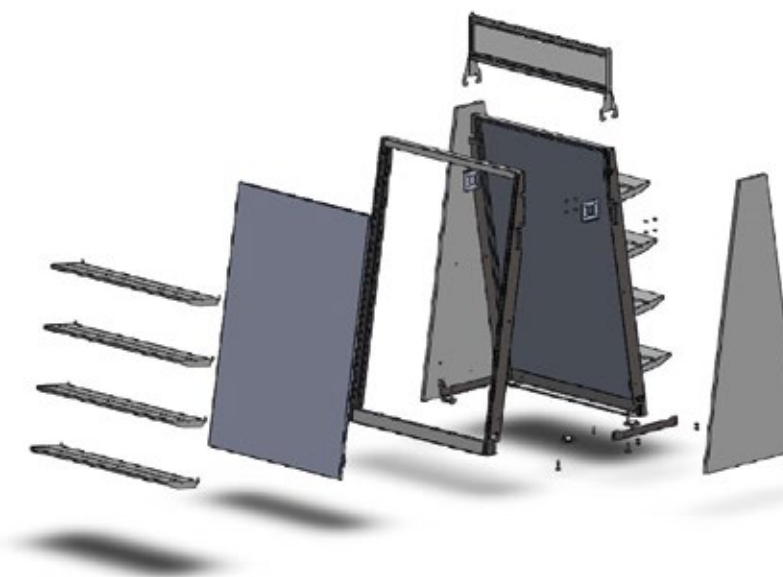

**biblomodel** can assist you with sales or service, please do not hesitate to contact our offices or your territorial dealer.
