systems

by **escato**[®]

biblomodel

is a premier manufacturer of library shelving and display systems.

the lines are clean and simple; the systems are extremely flexible in application and incredibly stable in performance.

it is easy to change or relocate collections without having to rearrange frame designs.

each system can be used in a mobile fashion adding casters to the frames.

extremely flexible
extremely durable

exceptional merchandising
and display capabilities

forte

starter - adder cantilevered steel shelving and display system

forte cantilevered steel shelving system provides exceptional storage capacity in an elegant and understated fashion with numerous display options:

- a modular design of single or double-faced upright columns welded to perpendicular bases to provide exceptional stability
- designed to provide the maximum shelf capacity with minimum floor space utilization – the bases and the shelves can be the same depth even in the higher measurements
- a full complement of accessories with numerous shelves for display and browsing
- for higher seismic requirements stabilizing gussets are provided that are welded, not clipped to the upright columns. floor and wall anchoring devices are also provided
- standard upright heights range from 42" to 90" in 6" increments
- shelf depths range from 8" to 12" in 1" increments and an additional 15-3/4" depth is provided for oversized material, maximum capacity and tiered display
- standard widths including all component options are 36" and 30". 39" widths are available including most component options
