

OnSpecTM Table Shield

www.library-shield.com

OnSpecTM Table Shield is a modular system of acrylic space dividers and personal protective barriers that can be easily field modified and adjusted to accommodate a variety of configurations without the use of tools. Parts can be used to create adjacent spaces of equal or varying widths. A table position shield can be a stand-alone unit or used in conjunction with additional components to form multiple user stations. They can be assembled and reconfigured at any time.

All panel parts are made of sturdy 1/8" Acrylic (clear or frosted) with polished edges and eased radiused corners. The standard height is 24". The three standard widths are 48", 32" and 24". There are two options for the acrylic finish: CLEAR transparent and FROSTED translucent.

The corner connectors are made of durable clear Lexan acrylic. Base connectors can be attached to all types of surfaces by means of clear REMO tape (like the CommandTM products). They will not damage surfaces and are relocatable.

Components:

Face Panels:

TSS4824 \$ 105
Face Panel

TSS3224 \$ 80
Face Panel

TSS2424 \$ 65
Face/Side Panel

Connectors:

\$ 8.50

2-way

\$ 8.50

4-way

\$ 8.50

base - includes REMO tape
