TMC is inspired by the noble heritage of our public libraries and we recognize the powerful role of the library in the lives of individuals and its importance as a community resource.

The interior of the multi-functional modern library must meet the diverse needs of the staff and public. TMC offers products to fulfill all of those needs. We strive to design exemplary products that make us proud to be part of such communities. Libraries represent the civic pride of the communities that support them and which they serve. Like librarians, we too understand and respect the importance of community and individuality. Our products are innately expressive and offer many options to tailor them to the uniqueness and beauty of any library interior. At TMC we build and design products around our company values: timeless design, natural materials, durability and quality. All of our products are made in Michigan. TMC helps keep the librarian's mission, to serve the distribution of knowledge in their community alive and well, so the library remains a place where serendipity happens and curiosity can flourish.

Who We Are

We are a dedicated group of artists, woodworkers and engineers who are passionate about making furniture that is strong in design and craft. Furniture that will stand the test of time both visually and in quality. From backgrounds in fine art painting to theater design and illustration, our team is an eclectic mix of talent and passion. We are loyal to the basic tenets of good design, which begins when pencil meets paper in a sketchbook. We value quality craftsmanship and innovation. Our factory, located in Grand Rapids, where all of our furniture is proudly made, has over a century of combined experience; many of our team there are second and third generation woodworkers. We care deeply about providing well-built, well-engineered products that inspire and delight and are proud members of USGB and BIFMA.
