

TRIDEKON®

CROPSAVERS

DECIDE CONE TYPE: Set of four narrow cones – \$6,410 (most common) or set of two – \$3,410

Pick and add: The bolt-on/weld-on for your machine. The front and rear bolt-on for each machine have separate pricing.

For some machines that we don't have a bolt-on kit for we can supply a weld-on starter kit for the customer to fabricate their own mounting.

Decide: Do you want the airlift option, air compressor, HDJF, widening kit, outer quick attach cover or deflector extension shields?

You will need to know your tire size.

Bolt On

	Front	Rear	Set of 4
Apache drop boxes	575	575	1150
angle drive	575	412.50	987.50
Case 3230-4440/ Case Cotton/ Case Trident	662.50	662.50	1325
Patriot/ Case 3150-3185	575	575	1150
Agrifac (ladder relocation kit \$560)	487.50	487.50	975
John Deere (all models)	487.50	487.50	975
GVM Mako / Spra-Coupe 3630-4660	412.50	350	762.50
Spra-Coupe 7650 - 7660	575	737.50	1312.50
Rogator 2011 and older	575	575	1150

Weld On Weld-on is used for tractors, pull-type sprayers, Willmar, Front: \$350 Rear: \$350 Rogator 854-1254 and pre 2000 Hagie Sprayers

OPTIONS

NEW Inner Crop Protection Shields

Adjustable length and mounted on parallel lift arms for added strength to guide crop away from sprayer for maximum protection performance, further increasing savings per acre.

\$550 set of 4

Widening Kit

Made from stainless steel simply bolt the widening kit to your Cropsavers to add up to 5" to the width of your divider. With a 19" Standard Wide Cropsaver and the widening kit you have 24" of coverage or up to a 600mm floater tire.

\$44 each (one per cone)

Outer Quick Attach Cover

Use the outer quick attach cover when spraying without your Cropsavers. The cover will prevent crop from striking the inside of the outer quick attach.

\$44 each

Air Lift

Airlift option gives you the capability of raising and lowering the cones from a switch in the cab. It runs off the on-board air on the machine.

Airkit	Set of 4 - \$1795	Set of 2 - \$1410	Air Compressor - \$825
--------	-------------------	-------------------	------------------------

Air Compressor

If your machine doesn't have on-board air, or fails to produce the required 60-70 lbs of air required for Cropsavers airlift. The air compressor kit provides a 12 volt compressor that can be installed to produce the required air pressure. **\$825**

HD Jack Stand

NEW! Heavy Duty Jack Stand - makes tire changes safer and faster. It quick attaches to the Cropsaver mounting bracket and uses your existing high capacity hydraulic bottle jack. **\$605**

Outer Deflector Extension Shields

Mounted on the outside of the Cropsaver cone and deflector arm to help guide crop past the wheel **\$137.50 per cone**

CONE TYPES

16" to 19" Standard cones. Available in two widths – 16" no additional cost, 19" wide \$95 extra per cone.

Bean Tip splits crop closer to the ground. Use in pulse crops, potatoes and row crops. No additional costs.

Narrow Short Cone for tight horizontal applications. Recommended for articulating machines and models with clearance issues. eg. front boom machines. No additional costs.

Wide Short Cone NOW AVAILABLE 21" for wider tires. \$175 per wide short cone.

Chopped Cone have the top cut off used for tight vertical applications. \$165 extra per 16" narrow cone. \$260 extra per 19" wide cone.
