SPECTRA USA

WHOLESALE PRICE LIST

2026

Customer Service

Customer Service Department is available Monday-Thursday 8am-4:30pm EST, Friday 8am-Noon.

Phone #: 336-885-6001

Orders should be submitted to: orders@spectrahomefurniture.com , any other inquiries should be directed to customer service.

Payment & Terms

Spectra Home reserves the right to change product prices and / or specifications without notification.

A CIT credit line is available to qualified dealers and may be established by contacting the accounting department. We may change or cancel terms at our discretion.

We do not ship C. O. D., all orders either need to be paid through CIT, Check, or Credit Card prior to shipping.

Product Care & Maintenance

To extend the life of your upholstered furniture we suggest frequent gentle vacuuming or light brushing, depending on the fabric to remove dust and loose dirt. Pillows should be fluffed and cushions flipped and rotated regularly.

Warranty*

- Frame & Suspension – Limited Lifetime
- Cushion / Pillow Foam or Fiber – 3 Years **
- Manufacturing Defects – 1 Year
- Swivel & Glider Mechanisms – 1 Year
- Textiles – Defects -1 year (pilling, normal wear and tear is NOT covered)

***Foam and Fiber will soften, crush and flatten with use. Such characteristics should be expected, not considered defects and are not covered under warranty.*

Defects

To process a warranty claim, email your customer service representative, providing the following information or fill out the claim form found on our website:

- Original Acknowledgement or invoice number
- Written description of issue
- Photos of product and affected area

PRODUCT INFORMATION

Frame

Spectra Home frames are made from furniture grade ¾", 7 ply or better, cross-grained domestically sourced hardwood plywood. Frame parts are assembled by interlocking components that are then glued and stapled at all contact points. Plywood is CARB compliant and bears a Forrest Stewardship Council Certification.

Spring System

Our products utilize different suspension methods depending on the style. Typical suspension methods included high resiliency rubberized webbing or sinuous loop carbon steel springs.

Cushions

Standard seat cushions use CertiPUR-US® certified foam consisting of 2.2lb High Resiliency (HR) flexible polyurethane foam.

Cushion cores include a foam crown patch top and bottom to provide long lasting shape. Cushions are encased in a down proof ticking with a mixture of 50% feathers and 50% fiber.

Dimensions

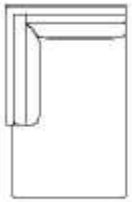

All specifications and measurements in this price list are approximate and based on the latest information available at the time of printing. The factory assumes no responsibility for minor deviations from these measurements. Spectra Home reserves the right to make necessary changes to materials, finishes, patterns and specifications at any time.

Product Orientation

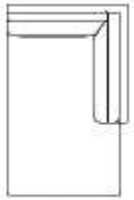

Many products we offer have a distinctive feature that will determine a direction of left or right.

Generally, the arm is the first choice to determine a product as Left or Right. Always refer to the current schematic and submit a clearly marked copy with each purchase order. For chaises and loveseats stand at the foot of the piece facing towards it and describe the arm placement as shown below.

Example

LAF Chaise

RAF Chaise

Contrasting Fabrics

Contrasting Fabric on Throw pillows – no extra charge

Wood Finish

All our current wood finishes are standard at no charge:

- ANTIQUE HONEY (G)
- ASHE (M)
- ESPRESSO (E)
- LEGACY (L)
- OLD ENGLISH (O)
- OVERCAST (X)
- UMBER (4)

Fabric Care

Fabrics should be professionally cleaned using the following guidelines. Cleaning codes are displayed on the fabric swatch label. Test any solution on hidden area of fabric prior to using.

- Cleaning Code - “W” - Clean this fabric with the foam only of a water-based cleaning agent to remove overall soil. Many household cleaning solvents are harmful to the color and life of fabrics that have cleaning code “W”
- Cleaning Code - “S/W” - Clean this fabric with the foam only of a water-based cleaning agent OR with a pure solvent in a well-ventilated room.
- Cleaning Code - “S” - Clean this fabric with pure solvents. Use of water-based or detergent-based solvent cleaners may cause excessive shrinking. Water stains can become permanent and unable to be removed with solvent cleaning agents.

Fabric Application

Fabric is applied either Railroad (Across the Roll) or Up the Roll (In Roll). Fabrics applied Up the Roll often requires extra seams to cover areas that are wider than the fabric, like a bench cushion. Railroading a fabric avoids extra seaming.

Performance Fabrics

Premium performance fabrics selected for unique soil/stain resistance and durability. Fabric swatch labels indicate the specific brand of performance.

C0 fabric treatment is a sustainable, PFAS-free Durable Water Repellent (DWR) made from hydrocarbon-based, silicon-based, or paraffin-based chemistries. Unlike traditional PFC-based treatments, C0 uses non-toxic, eco-friendly, and often plant-based materials to create a hydrophobic layer that forces water to bead and roll off.

Key Components and Characteristics:

- **Chemistry Base:** Primarily composed of silicones, paraffins, or polyurethane.
- **PFAS-Free:** Contains no per- and polyfluoroalkyl substances (PFAS).
- **Environmental Impact:** Non-toxic, biodegradable, and safer for the environment.
- **Performance:** Offers strong water repellency, but generally lower oil and stain resistance compared to C6 or C8 treatments.

Fabric Memo Samples

Fabric Memo samples can be requested via email through customer service.

COM - Customers Own Material

When using COM fabric, products are priced at Group 11. COM yardage requirements for each style are listed in the price list.

COM requirements are per piece and assume the following:

- Fabric has no pattern
- Fabric is non-directional
- Fabric is 54” wide
- Fabric is upholstery weight

COM Suitability

Spectra Home is not responsible for the tailoring or appearance of certain COM fabrics. It is the customer's responsibility to provide COM suitable for upholstery on the specific furniture product selected. Many unbacked fabrics such as silk are not suitable for upholstery. If you have any doubt as to the suitability of the COM selected, you may submit a sample to customer service for review and testing.

We reserve the right to refuse to manufacture products with fabric that is deemed unsuitable. Industry standard is for the face of the fabric to be rolled inward; Spectra Home follows this standard.

COM Requirements

COM fabric will be applied railroaded unless specific application instructions are provided. A COM fabric application diagram using a copy of catalog page should be submitted with your order.

Use the list below to determine additional yardage requirements for any COM containing a motif, pattern or directional weave. COM shipped short will result in production delays.

- Up the roll fabrics – COM requirement plus 20%
- Fabrics with 1"-7" pattern repeat – COM requirement plus 20%
- Fabrics with 8"-15" pattern repeat- COM requirement plus 30%
- Fabrics with 16" plus pattern repeat – COM requirement plus 40%

Disclaimer: While every attempt is made to double match patterns, certain styles and/or fabrics present challenges that prohibit matching. Please contact customer service with any matching concerns prior to production.

COM Orders

The following information must accompany your PO:

- Small cutting or good quality color image of fabric being supplied
- Application instructions including face side of fabric, application direction and/or specific motif centering
- Name of fabric vendor
- Pattern name/number
- Color name/number
- Spectra Home is not responsible for delays or errors due to improperly identified COM
- Name on COM shipment must match PO/Name or Account
- Shipment must include your PO# or Spectra Home Ack# and be notated with project/customer name

Leftover material will be returned upon request. Return request and shipping instructions MUST be included with your purchase order.

$75 handling fee + Freight will be charged for all return requests made after fabric has been cut.

COM FORM

Proper identification of your fabric is VERY important. If Spectra Home cannot identify your fabric, your order cannot be put into production. To avoid unnecessary delay, make certain the following form is included with the shipment of your fabric.

ATTACH SWATCH IF POSSIBLE, WITH FORM

SHIPPING ADDRESS:

Spectra Home COM DEPARTMENT
3025 HAMP STONE ROAD
SILER CITY, NC 27344

SPECIAL INSTRUCTIONS	

Fabric is applied either Railroad (Across the Roll) or Up the Roll (In Roll). Examples of each are below. Fabrics applied Up the Roll often require extra seams to cover areas that are wider than the fabric, as in a bench seat cushion for example. Railroading a fabric avoids extra seaming.

Spectra Home assumes all fabric will be applied Railroaded unless otherwise noted. It is the customer's responsibility to advise specific application instructions regarding cut direction, which side of the COM is the face side as well as the top or bottom of the motif. In the event no specific application information is supplied by customer, Spectra Home reserves the right to determine placement of seams, which side of the COM is correct, and which is the top of the pattern.

Roll of RAILROAD fabric showing the direction the fabric will be shown on the sofa.

Roll of RAILROAD fabric with a pattern, showing the direction the fabric will be shown on the sofa.

Roll of UP THE ROLL fabric with a pattern showing the direction the fabric will be shown on the sofa.

Seam Placement on Chaise Lounges

Due to the extended length of some Spectra Home Chaises, we must place a seam in the top of the chaise cushion. If the direction of the fabric limits our option of cutting across the bolt, then we will locate the seam under the back pillow of chaise. In extreme cases if this is not an option, we will place the seam at the cushion break of the adjacent piece. Please contact customer service with any questions.

Freight

You may request shipment by a specific carrier on your purchase order. If no carrier has been selected customer service will contact you for a carrier which can delay your shipment. You are responsible for inspecting merchandise upon arrival. All detected damage should be photographed, notated on your bill of lading and reported to the carrier immediately.

If the quantity of cartons/packages is short of your bill of lading, we advise accepting the shipment after noting shortages on all documents. Failure to note a shortage will result in payment of the number of cartons/packages that were signed for. Please contact customer service if there is a shortage and send a copy of the Bill of Lading showing your signature indicating the shortage.

Packaging

All furniture products are protected by heavy duty sealed air bubble wrap bags. Corners are protected by cardboard guards and most products are placed into a cardboard tray for transport.

Leather Descriptions	
Aniline	Leather that has been dyed throughout, producing vibrant colors and perserving the hides' natural markings and charcteristics. Pigmented leather is the most durable, having a polymer coating.
Semi-Aniline	Leather that has been aniline dyed, then color corrected to cover blemishes and to add a form of protection to the hide.
Embossed	Leather that has a pattern applied by extreme pressure to the hide to create a unique look, i.e Alligator
Pull-Up	Describes the behavior of the leather that has been treated with oils, waxes and dyes. When the leather is stretched , the finish becomes lighter. Considered a high mark of quality.
