EMERGENCY START FOR CARS STEP

1
Connect the red clip to the positive terminal of the car battery and the black clip to the negative terminal of the car battery.

2
Open the protective silicone of the emergency start power port and connect the other end of the clip (Do terminal) to the emergency start port of the battery.

3
Insert the car key and start the vehicle
Note: The car cannot be continuously fired when it is started. When the start is unsuccessful, wait 2 minutes before starting the second ignition.

4
After the vehicle is started, firstly remove the DO terminal of the clip, and put the protective silicone of the DO port on, then remove the clip on the battery.
