

LAUNDRY JET

DATA SHEET

Plus **VUELO**

220V

The Laundry Jet Plus Vuelo integrates seamlessly into any custom laundry room design and is our top of the range model in terms of custom style, capacity and number of ports. The Plus Vuelo installs inside your own custom cabinetry to maintain the overall aesthetic in your laundry room while adding the maximum benefit of the Laundry Jet technology. The Plus can utilize all styles of Laundry Jet Ports (manual or automatic) and has an automated cycle which allows the user to insert clothes, towels, or bedding, leaving the Plus Vuelo to transport and then auto empty in the laundry room. This allows the system to be immediately used again. The Laundry Jet Plus Vuelo handles up to 8 different port locations and can be installed with a Return Unit Option which uses one of the port connections and enables sending cleaned and dried laundry back to a chosen bedroom or location in the home, usually to stop carrying clean laundry back upstairs.

Tech Data
