

The Laundry Jet iSense Port is our latest automatic port design. It is the automatic version of the Slide Port and lower cost than our premium metal Wave Port, retaining the functionality and style of the Laundry Jet brand and matches perfectly with modern design. It provides the simplest, easy to use, auto open functionality. Constructed of durable plastic the iSense Port is simply mounted by screws, to the wall. It is opened by just a wave of the hand and closes automatically after the systems 20 second timed cycle. It can be installed in 3 different orientations depending on your desired location giving maximum flexibility. For example, you can install it to open to the left because of a door jam on the right and vice a versa, including up if required for maximum design and installation flexibility. Once opened, the dirty laundry, bed sheets and even damp towels are simply fed into the now open port and drawn away to the laundry room.

Tech Data

Auto opening with double wave of the hand

White plastic finish, mounted by screwing to wall.

Cat 5 cable

RJ 45 connectors

24 volt

Airflow CFM 1000

Speed approx. 35-40 mph
