# **Very Special Pellets**

*We are offering our last of  
our special pellets*

**We only have a  
limited number left**

1. All of the individual pellets in the group are attached to each other by a tiny metal connectors, so they easily bend around fingers or conform to special curves in the hand.
- 2 .They are called #2,5,10 & 12's. representing the number of pellets on each tape (see below)
3. We found them convenient for joints and special areas.
4. Currently, when points are close together you have to spend a lot of time creating a "new" pellet from multiple #1's. These pellets are more convenient.
5. Unfortunately, they are no longer manufactured.
