KHT Safety Laser: Red

The laser of choice by health professionals worldwide

This is a heavy duty, **635 nm Red Laser** is designed for long use with a constant on/off button in the base. This laser is a plus power, constant wave diode circuit type with computerized APC. The lasers are factory tuned and tested on a laser power meter. It includes disposable black cone attachments designed by doctors to limit eye exposure from laser scatter light. These tips come in two sizes, which allows safe stimulation of acupuncture points. The smaller tip is very useful for auriculotherapy and for points close to the eyes. Dental tips are perfect for oral use.

**For meridian acupoints, stimulate 3 - 6 points per treatment for 60 - 120 seconds each.
More time as needed for trigger and motor points.**

The Kit Includes:

- Travel Case
- Disposable Sanitary tips
- Acutips
- Two AAA batteries
- Includes a 2 year warranty
- *Operating Instructions*

Research demonstrates that a wavelength of 635 nm (1 nanometer is 1/billionth of a meter) is the frequency of a healthy cell and is optimal for healing and most beneficial for stimulating acupuncture points.

\$149.00

This complete laser acupuncture treatment system meets USA - FDA Laser Safety Regulations. This quality **635 nm red laser** with an output of 5 mw, is powered by two AA batteries (included). These quality units should not be confused with inexpensive laser pointers which are in the range of 650 - 670 nm. Research demonstrates that a wavelength of **635 nm** (1 nanometer is 1/billionth of a meter) is the frequency of a healthy cell and is optimal for healing and most beneficial for stimulating acupuncture points.

This product is not intended to diagnose, treat, cure, or prevent any disease.

\$159.00

The green laser has proven to be effective in the treatment of soft tissue injuries, muscles, ligaments, and tendons.

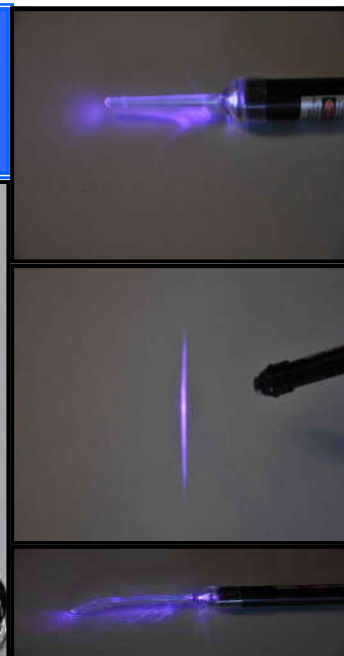

The green laser is also great for dental illumination. Almost 90% of decay begins in the pits and groves of the biting surfaces of the teeth. The non invasive laser light scanned over the tooth's surface is able to illuminate potential problems

This complete laser acupuncture treatment system meets USA - FDA Laser Safety Regulations. This quality 532 nm green laser has an output of 5 mw, is powered by two AA batteries (included). These quality units should not be confused with inexpensive laser pointers which are in the range of 650 - 670 nm. There are several advantages to using the lasers over needles: Painless, but effective - Great for anyone who is afraid of needle treatment. It is harmless, as the laser energy penetrating the skin is only 5 mw. It does not cause any tissue damage,
