Specify Fibre Cement facade systems with confidence

bgcinnoovadesign.com.au /fire-resistant

Innova™ deemed to comply external facade systems.

- / Compressed fibre cement range
- / Architectural designed weatherboard range
- / Grooved and profiled cladding range

BGC's products have superior fire performance against four key indices.

Ignition index = 0

Fibre cement does not ignite

Spread of flame index = 0

There is no spread of fire with fibre cement

Heat evolved index = 0

Heat does not evolve from fibre cement

Smoke developed index = 0-1

Smoke is not emitted from fibre cement

Up to **BAL 40**
as per AS3959:2018

Tested in Australia by accredited Australian authorities **CSIRO** and **Exova Warrington**

Case Study 01.

Residential

Project: Pridue & Hall
Location: Box Hill, NSW
Client: Kastelan Designer Homes
Products used: Montage™ Wood Grain in Black Oak / Montage™ Concrete in Smooth Plain- Horizontal / Montage™ Stackstone in Limestone

Pridue & Hall is a 3 bedroom, two-storey house with a unique design in collaboration with the client and the builder. The client envisioned earthy colours and textures throughout. The 3 different Montage™ products have created a created the perfect solution- a unique and sleek façade.

Case Study 02. Commercial

Project: Westfield Shopping Centre
Location: Carousel, Western Australia
Architect: Scentre Group
Contractor: Denmac
Products used: Duracom™ / Duralux™

BGC supplied a variety of fibre cement products to the new extension to the Westfield Carousel Shopping Centre. Duracom™ was used by Denmac who were contracted to install the external cladding. Duralux™ was also used as soffit lining, which was installed by EXZO. BGC products allowed both Denmac and EXZO to achieve a robust finish without sacrificing design objectives.

“Duracom™ is backed by a well established company which means the product is always available when we need it, which minimised site laydown”.

Rob Innocent
Denmac

The Duragrid™ facade system utilises BGC Fibre Cement sheeting, offering the ideal solution for cladding the exterior of low to medium rise homes. Duragrid™ gives buildings a modern and extremely durable finish.

Duragrid™ sheeting has a smooth, flat surface and square-edge finish that is suitable for expressed jointing and provides a facade suitable for a number of finishes; from painted to textured coatings.

- / Lightweight
- / Highly durable
- / Panels will not rot, burn or corrode
- / Panels are not affected by termites, air, steam, salt or sunlight
- / Can be easily decorated in a number of design finishes
- / Quick and simple to install using manual nailing, gun nailing or screw fixing

With its smooth, flat surface and square-edge finish, Duracom™ facade system is ideal for the exterior cladding of low to medium rise buildings. Utilising BGC's trusted fibre cement coated compressed sheeting, Duracom™ delivers a strikingly modern, durable finish.

Lightweight yet exceptionally resilient, Duracom™ facade system is perfect for expressed jointing and a variety of finishes; from painted to textured coatings.

- / Weather-resistant – simply shrugs off water. Rated for weatherability by CSIRO
- / Fully-sealed, balanced panels won't rot, burn or corrode
- / Allows easy decoration in a range of design finishes
- / Rapid installation
- / Complies with BAL40 as required in AS3959:2018 – construction of buildings in bushfire-prone areas

For up-to-the-minute exteriors or interiors, choose Duragroove™ cladding. A peerlessly adaptable, vertically-grooved panel available in different profiles and spacing, Duragroove™ has a shiplap join to ease and speed your installation.

Specify Duragroove™ for single-storey and medium-height projects. Duragroove™ comes in four variants:

- / Smooth Narrow 100mm
- / Smooth Wide 150mm
- / Smooth Extra Wide 400mm
- / Woodgrain Wide 150mm

- / Vertical grooves – excitingly contemporary alternative to traditional weatherboard
- / Lightweight and durable
- / Factory sealed panels aid paint application
- / Quick to install – no need for taped and filled joints
- / Panels resistant to termites, air, steam, salt and sunlight

INNOVA™ FINISH ON SITE

Durascape™ is a 9mm-thick base sheet. Excellent for covering large areas; its 5mm wide shiplap joint gives the sheet a subtle vertical shadow line.

To create an appealingly ‘rendered’ look, try finishing Durascape™ onsite with a roll-on textured paint.

NulineTM Plus is a weatherboard-style cladding. With its perfect join and a seductive look that echoes real timber, NulineTM Plus is the natural evolution of the ever-popular NulineTM weatherboard.

The NulineTM Plus tongue & groove fixing will deliver seamlessly consistent joins throughout your project. With its slight bevel on the rear of the plank allowing a 25mm bearing face on the stud, you'll find fixing and nailing exceptionally easy.

- / Weatherboards are primed for ease of paint application
- / Extend your options with 2 different profiles: square and bullnose
- / Factory sealed, ready for painting
- / Quick, simple installation: manual nailing, Gun nailing or screw fixing
- / Highly durable: no rot or decay
- / Complies with BAL40 as required in AS3959:2018 construction of buildings in bushfire-prone areas

When ordering Snap on Corners, 2 parts must be ordered, Part A + Part B or Part B + Part C.

Stonesheet™ is your first call for a stone tile substrate and background for true masonry on timber or steel-framed buildings. A flat, square-edged sheet, Stonesheet™ comes as 9mm-thick panels.

Designed specially as a substrate for both residential interior and exterior applications, Stonesheet™ is an excellent alternative where other non-specifically designed substrates have been used.

- / Exterior and interior stone tile facades
- / Non-structural substrate
- / Classified type A category 3 for exterior use
- / Will take maximum stone facade weight of 40kg/m²

Use Intergroove™ internal wall lining to create a modern floor to ceiling feature wall or half height to create a more traditional look. Intergroove™ is a strong and durable wall panel that has been specially designed for internal use.

The V shaped groove featured in Intergroove™ provides the look of traditional panelling combined with the durability and ease of maintenance of fibre cement.

- / Lightweight and durable
- / Quick to install as it eliminates the need for taped and filled joints
- / Factory sealed panels aid paint application
- / Provides a tough durable finish, ideal for areas where impact and moisture resistance is required

Montage™ is a versatile fibre cement facade system that can be used both externally and internally. It's pre-formed, pre-finished and non-combustible, making it a durable, safe and aesthetic addition to your project.

With a colour palette carefully considered to be blended or contrasted, you'll have an array of options to play with. The deep form embossed into the panels also creates a striking effect, making your project stand out from the streetscape.

/ Easy to install and designed to withstand the elements, Montage™ was created with critical specifying needs in mind. Not only does it look stunning, but its simple installation speeds up the building process too – reducing project build time with no need for finishing trades.

FLOORING SUBSTRATE

Your ultimate flooring solution, Durafloor™ is superb for interior wet areas such as bathrooms and laundries. You can also specify Durafloor™ for a variety of exterior uses.

Choose Durafloor™ for balconies, verandahs and sun decks. Alternatively, where premium quality is your main concern, insist on Durafloor™ as a total floor solution.

Use 19mm Durafloor™ where joist spacings are at 450mm centres. Durafloor™ 19mm has a pink tongue. Use 22mm Durafloor™ where joist spacings are at 600mm centres. Durafloor™ 22mm has a blue tongue.

- / Easy installation via traditional gun-nailing methods
- / Installation costs lower than standard compressed sheet
- / Same tongue & groove technology as traditional sheet flooring (eg: Structaflor®)
- / Greater impact resistance – feels more solid underfoot than timber-based sheet flooring products

FLOORING SUBSTRATE

High-density Compressed fibre cement sheeting is a superlative substrate for interior floors in framed-construction wet areas. Ideal for upper storeys and transportable buildings, it's equally suited for use as a substrate for exterior decks.

Compressed fibre cement sheeting is manufactured from cement, finely-ground silica, cellulose fibres and water. After forming, we compress the sheeting to high density, then cure it in a high-pressure steam autoclave for an exceptionally durable, fit-for-purpose product.

- / Immune to permanent water damage
- / Impact-resistant and immune to termite attacks
- / Highly durable and dimensionally stable
- / Suitable for wet areas and for cladding external decking
- / Non-combustible and easy to work

BGC FIBRE CEMENT

Durasheet™ provides first-rate external cladding for gable ends, eaves, soffits, carports and verandah linings. It's a general-purpose sheet you can use on both timber and steel-framed buildings.

Durasheet™ comes in two thicknesses to suit both residential and light commercial fibre cement applications, significantly extending your professional specifying choice.

- / 4.5mm thickness: used mainly in timber-framed residential buildings for soffit/eaves linings and cladding features such as gable ends
- / 6mm thickness: recommended for residential and light commercial applications, cyclonic wind zones and steel-framed constructions
- / Classified as Type A Category 3 for exterior use

In its appealing look and easy installation, the design of Duraplank™ evokes traditional weatherboards. Duraplank™ won't decay, rot or become damaged by white ants, and it's non-combustible.

Beautifully attractive – you have the option of a smooth finish, a woodgrain or a rustic texture for an authentic weatherboard look – Duraplank™ also has the strength to withstand the rigours of family life.

- / Similar flavour to traditional weatherboards
- / No decay, rot or white ant damage
- / Safe and durable – needs only minimum maintenance
- / Variety of finishes
- / Complies with BAL29 as required in AS3959:2018 – Construction of buildings in bushfire-prone areas

A tough, durable, waterproof external cladding system, Duratex™ provides a solid substrate for applied decorative finishes when combined with proprietary jointing and coating systems.

Tough, durable, waterproof and fire-resistant, Duratex™ is great for lightweight construction and features a factory-applied blue tint to help with identification.

- / Specify for residential and commercial applications
- / Accepts a wide range of textured coatings
- / Complies with AS3959:2018 – Construction of buildings in bushfire-prone areas (7.5mm: BAL29; 9mm: BAL40)

DuralinerTM Plus is a general-purpose fibre cement building board. Designed for flush jointing, DuralinerTM Plus is highly effective for use in wet areas, interior linings, ceilings, as a substrate for ceramic wall tiles and for fire and acoustically-rated interior walls.

You can also specify DuralinerTM Plus for soffits and other external applications where there'll be no direct impact from the weather.

- / Wide range of applications
- / Specify as part of fire and acoustic-rated wall systems
- / Rebated on 3 edges for easy jointing and installation
- / Classified as Type B Category 3 product for use in applications sheltered from direct weathering

BGC FIBRE CEMENT

DuraluxTM Plus is a general-purpose fibre cement building board that you can use for many different and demanding applications. Among these are interior lining, domestic and commercial soffits, exposed beam ceilings, in wet areas and as a substrate for ceramic wall tiles.

Quick and easy to apply to timber or steel, its two available thicknesses make DuraluxTM Plus a flawless choice for many domestic and commercial applications.

- / Easy, correct installation and maintenance will ensure full water-resistance
- / Simply decorated in a variety of finishes
- / Classified as Type B Category 3 product for use in applications sheltered from direct weathering

Warranty

We warrant that our products are free from defects caused by faulty manufacture or materials for the following period from the date of purchase:

- 25 years for the Nuline™ Plus, Stratum™ and Duraplank™ ranges
- 10 years for the Montage™ range and
- 15 years for all other BGC Fibre Cement and Innova™ ranges

If you acquire any defective products, we will repair or replace them, supply equivalent replacement products or refund the purchase price within 30 days of receiving a valid claim, subject to product inspection and confirmation of the existence of a defect by BGC. We will bear the cost of any such repair, replacement or refund.

This warranty is given by:

BGC Fibre Cement Pty Ltd

Ground Floor, 290 Bushmead Road, Hazelmere WA 6055
Phone 08 9374 2900 Fax 08 9374 2901

To claim under this warranty, you must provide proof of purchase as a consumer and make a written claim (including any costs of claiming) to us at the address specified above within 30 days after the defect was reasonably apparent, or if the defect was reasonably apparent prior to installation, the claim must be made prior to installation. You may not claim under this warranty for loss or damage caused by:

- faulty or incorrect installation by non-BGC installers (BGC's installation procedures are at bgcinnovadesign.com.au);
- failure to comply with the Building Code of Australia or any applicable legislation, regulations approvals and standards;
- products not made or supplied by BGC;
- abnormal use of the product; or
- normal wear and tear.

The benefits available under this warranty are in addition to other rights and remedies of the consumer under the law. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage.

You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Terms and Conditions

BGC Fibre Cement's Terms and Conditions of Sale ("Agreement"), as in place and published at the date of this brochure, which are available upon request or on our website at www.bgcinnovadesign.com.au. The purchaser's terms and conditions, howsoever provided, do not form part of the Agreement.
