Industrial Experts

We have nearly 25 years of experience in all types of industrial projects including: automotive research and development, light industrial, heavy industrial, stamping plants, manufacturing, aviation hangars, and warehouse/storage. Our work has included new greenfield sites, brown-field sites, renovation, addition, adaptive re-use, and maintenance projects. Additionally, we have completed a large percentage of these projects on a design-build basis and many have included pre-engineered metal buildings/structure for all or part of the project.

Please consider making us a part of your Team for your next design-build industrial project.

Please follow our business LinkedIn Page at: <https://www.linkedin.com/in/robertljordan416256/>;
