#serenityarchitectureco #serenityarchitecture

We have vast experience in many types of governmental projects, with a specialty in the design-build delivery method. Our past projects include police, fire, city hall, library, civic, recreation, and community center, to name a few.; and we have completed greenfield, renovation, addition, adaptive re-use, roof replacement, and window replacement projects; along with master planning, feasible studies, and needs assessments.

Please consider us as your next project partner.
