

50 Series Aluminium Casement Window Non-Thermal Break

The VistaHaus 50 Series Aluminium Casement Window offers a refined balance of strength, precision, and contemporary design—engineered for Australian homes that value clean lines and dependable performance.

Manufactured from high-grade aluminium profiles, the system provides excellent structural integrity and smooth, controlled operation. Precision sealing, combined with insulated glazing options, helps minimise external noise and dust intrusion, enhancing comfort across a range of residential settings.

With flexible inward- and outward-opening configurations, the 50 Series supports effective natural ventilation while maintaining a streamlined aesthetic. It is ideally suited to bedrooms, kitchens, and living spaces where durability, ease of use, and understated elegance are essential.

Designed to integrate seamlessly into modern architectural forms, the 50 Series delivers reliable everyday performance without compromising on finish or form.

Key Features

- High-grade aluminium construction for long-term structural stability.
- Smooth, precision-engineered opening and closing action.
- Compatible with insulated glazing for improved acoustic comfort.
- Effective sealing to reduce dust and external noise.
- Inward and outward opening configurations available.
- Clean, minimalist profiles suited to contemporary architecture.
- Low-maintenance aluminium finish ideal for Australian conditions.
