

REDESIGNING MSK CARE DELIVERY

WHY INVEST IN A MSK SOLUTION?

Integrated Musculoskeletal Care

The need is growing for quality treatment and care. Over the past decade, the number of individuals who suffer from musculoskeletal disorders (MSDs) has increased by more than 25%. This percentage is expected to increase with an aging population.

TRIAGE QUESTIONNAIRE

Performed by a JointStrong® Health Coach or the Mobile Application to properly stratify patients into the appropriate category.

SELF-CARE

50+% of MSK cases can effectively self-treat and resolve their condition through provider guided, health coach guided or mobile app guided self-care protocols.

CONSERVATIVE CARE

MSK patients that are unable to manage or resolve their condition with self-care protocols, require escalation into conservative care through the JointStrong® clinical network or virtual care platform.

SPECIALTY CARE

MSK patients unable to resolve their condition through self-care or conservative care programs may require escalation into specialty care.
