

KEY PERSONNEL RESUME

Jason Kline, PLS

Principal / President

jkline@wmksurveying.com | 702-912-1123

Licenses:

Nevada Professional Land Surveyor, No. 17827

Industry Tenure:

1995

Firm Tenure:

2011

As Principal, President, and second-largest equity partner of Wallace Morris Kline Surveying (WMK), I bring nearly three decades of land surveying and land development experience serving federal, state, municipal, and private sector clients. Since joining WMK in 2011, I have played a central role in expanding our mapping operations, refining our project delivery standards, and ensuring client satisfaction on high-profile public works, infrastructure, and master-planned community developments.

I manage day-to-day operations for WMK's mapping division, directing project managers, survey staff, and technical teams to deliver precise, compliant, and timely survey products. My oversight covers proposal development, project scheduling, staff training, technical review, quality control, and client relations. Known for my meticulous attention to detail, I ensure all deliverables meet both client expectations and stringent agency standards.

My project portfolio spans complex municipal improvements, large-scale water and sewer infrastructure, detention basin design, master-planned community surveys, ALTA/NSPS Land Title Surveys, boundary and topographic mapping, legal descriptions, and as-built surveys. I regularly manage multi-phase projects involving coordination with engineering firms, utility providers, and public agencies, ensuring seamless integration from initial research through final recordation.

Core Responsibilities & Expertise

Strategic Leadership – Directing WMK's mapping operations, aligning production standards with corporate growth goals, and mentoring project managers and field leaders.

Project Management – Leading survey efforts for major public infrastructure, utility upgrades, and private development, ensuring deliverables are accurate, on time, and within scope.

Technical Oversight – Reviewing and approving technical reports, plats, and plan sets for compliance with local, state, and federal requirements.

Client Engagement – Serving as the primary contact for municipalities, water districts, developers, and consultants, fostering relationships that result in repeat business and long-term contracts.

Quality Control – Maintaining WMK's reputation for precision by implementing rigorous review processes on all deliverables.

Select Project Experience

City of Henderson – Pittman Detention Basin & Bermuda/Larson Project – Managed survey and mapping services across six sections, including aerial control, supplemental topography, boundary establishment, and record of survey preparation.

North Las Vegas Detention Basin Upgrade – Directed survey work for basin improvements, reviewing multiple title reports, preparing constraints maps, conducting field surveys, and producing legal descriptions and exhibits.

LVVWD 3090 Zone North Interim Tank & Inlet/Outlet Pipeline – Provided boundary, control, topographic, legal, and record of survey services for a 5 MG above-grade steel tank and associated 30-inch inlet/outlet pipeline.

CCWRD Manhole & Pipe Rehabilitation (Package 6A) – Managed survey services for 51 manhole repairs and 10,500 LF of sewer pipeline rehabilitation, including relining, spot repairs, and trenchless construction methods.

Through a combination of technical expertise, disciplined project execution, and client-focused leadership, I have helped solidify WMK's position as a trusted surveying partner for both public and private sector projects across Nevada. My work continues to advance WMK's mission of delivering accurate, innovative, and dependable survey solutions while supporting the company's growth and long-term success.
