Kevin W. Wallace, PLS, WRS

Chief Executive Officer / Principal

kwallace@wmksurveying.com | 702-912-1121

Licenses:

Nevada Professional Land Surveyor No. 15977
Nevada Water Right Surveyor No. 1238

Industry Tenure:

1991

Firm Tenure:

2006

As Chief Executive Officer and co-founder of Wallace Morris Kline Surveying (WMK), I oversee the strategic vision, operational management, and business development of one of Nevada's leading land surveying and consulting firms. Since establishing WMK in 2006, I have led its growth from a small, hands-on operation into a multi-licensed, technology-forward firm with a strong reputation for precision, reliability, and client service across the western United States. My leadership blends decades of technical expertise with entrepreneurial business management, ensuring the firm meets the highest standards in both professional surveying practice and organizational performance.

In my executive role, I guide corporate strategy, financial management, and client relations while maintaining active involvement in complex, high-value projects. I direct the recruitment and mentoring of top industry talent, fostering a culture of professional growth and long-term retention. More than half of our employees have been with WMK for over 10 years—a testament to our emphasis on loyalty, training, and advancement. I champion the adoption of innovative survey technologies and streamlined workflows, ensuring WMK remains at the forefront of GPS, LiDAR, aerial photogrammetry, and CAD integration.

Operationally, I coordinate with our Public Works, Energy, and Land Development divisions to manage project portfolios spanning utility-scale energy infrastructure, transmission corridors, transportation improvements, water and sewer systems, and private development. I serve as principal-in-charge or project manager for key assignments, overseeing scope definition, budgeting, scheduling, and quality control. My responsibilities include:

Strategic Leadership & Growth – Steering WMK's expansion, diversifying services, opening new markets, and maintaining resilience through economic fluctuations.

Project Oversight – Managing multi-jurisdictional survey projects from inception to completion, including boundary, topographic, alignment, and construction staking services for public and private sector clients.

Quality Assurance – Enforcing WMK's rigorous QA/QC protocols, ensuring deliverables meet or exceed industry, client, and statutory standards.

Client Engagement – Building and sustaining relationships with municipalities, utilities, engineering firms, and renewable energy developers through master service agreements and repeat business.

Operational Management – Overseeing resource allocation, safety compliance, contract negotiations, and performance monitoring through regular executive reviews.

Technical Expertise – Directing survey methodologies including GPS RTK/Fast Static, control networks, ALTA/NSPS surveys, ROW mapping, legal description preparation, and integration of aerial and conventional data.

I have successfully led WMK through Nevada's largest infrastructure and renewable energy projects, including multi-hundred-mile transmission line surveys, large-scale solar developments, municipal roadway reconstructions, and complex right-of-way research assignments. My role requires balancing high-level corporate leadership with technical precision—ensuring WMK delivers accurate, timely, and cost-effective solutions that keep our clients' projects moving forward.
