Texas A&M University
0256 TAMU
College Station, Texas 77843-1584

Please treat this as a recommendation letter for Eric Reeves and EJS Associates, LLC. I have known Eric for 3 years while he has worked as a project manager doing Lighting and electrical projects at Texas A&M University. I believe Eric's experience with numerous programs and software applications will compliment any project he engages in. I have been consistently impressed by both Eric's attitude towards work and his performance on the job and projects he is tasked with.

Eric possesses solid skill in the field of electrical, programming, and building maintenance. These skills have enabled him to compose quality correspondence towards projects on campus that can have unpredictable tasks. He has also demonstrated analytical skills to diagnose programs and devise viable solutions to various clients throughout the university. His ability to remain unflustered during situations that can be chaotic proves his ability to work well under pressure.

Eric is creative, resourceful, and solution oriented. He frequently comes up with new and innovative approaches to projects that have been assigned to him. He performs with professionalism and is a great team member.

To conclude, I have been very satisfied with Eric's performance in every single project I have worked on with him. I highly recommend Eric without reservation. If you have any questions or concerns regarding Eric's performance or EJS Associates, LLC please contact me directly at 979-458-8122.

Sincerely,

Jason G. Hall
Utilities Engineer
Utilities & Energy Services (UES)
