

PROTECT CANTON FAMILIES

from Airport NOISE & LEAD POLLUTION

OUR NORWOOD AIRPORT CHALLENGE

- REPETITIVE LOW ALTITUDE (UNDER 1500 FT) OVERFLIGHTS OF OUR NEIGHBORHOODS, SCHOOLS AND PLAYGROUNDS!
- NOISE DISRUPTS LEARNING AND CAUSES CHRONIC HEALTH ISSUES
- AIRCRAFT ARE USING LEADED AVIATION FUEL, WE ARE DIRECTLY BELOW!

There is a plan to expand the Airport! Potentially increased traffic, bringing more noise and pollution to our community.

THE FACTS

NO SAFE LEVEL OF LEAD EXPOSURE; OUR CHILDREN AT GREATEST RISK

NO NOISE STUDY SINCE 1997, CANTON NOT INCLUDED!

The Airport operations are routing the low-level Piston powered repetitive overflights over the Town of Canton's schools, playgrounds and residential streets!

WHAT WE'RE ASKING FOR

- **STOP ALL Airport expansion initiatives**
- Immediate elimination of repetitive overflights below 2000 ft
- Independent comprehensive studies of noise and lead pollution
- Select board engagement with the Airport and FAA to provide updated flight paths for Norwood Airport in consideration of the surrounding towns
- Canton's Equal representation on Airport Management Board
