

THE SOUND OF LUXURY

KICKER® 2026
MARINE AUDIO

LET'S GO OVERBOARD!

KICKER's brand message to the world is "Livin' Loud" – taking whatever you have a passion for to the limit, done your way. For KICKER Marine, that became "GO OVERBOARD!"

On a boat or the water, it's taking the fun, excitement and adrenaline to the extreme, because that's how you do it. KICKER Marine gear helps you get there.

KICKER only designs and builds USCG (U.S. Coast Guard) and ABYC (American Boat and Yacht Council)-compliant accessory products. That's just part of what we call "KICKER Real Marine®."

The marine environment can take a huge toll on cosmetics and materials. Plastics get brittle and fade, foam speaker surrounds rot due to UV exposure, water creates its own issues, and saltwater even worse. All KICKER Real Marine products are protected from these elements and meet or exceed requirements in the following tests:

- + ASTM B117 Environmental and Salt-Spray (fog) Exposure
- + ASTM G154 Ultraviolet (UV) Exposure

KICKER REAL MARINE ACOUSTICS

KICKER Marine Speakers are weatherproof thanks to KICKER's Real Marine standards. They employ several key mechanical features to provide resistance to the marine environment. We mold the cone and surround together as a single unit to lock out moisture. We seal the cone and motor structure to prevent rust. We seal off electrical connections to prevent corrosion. We provide a drainage channel so water can exit the drivers. Rain? Dust? Spilled beverages? No problem. Simply get out the garden hose and rinse them off.

KICKER Marine Speakers are built using injection-molded poly-carbonate materials for their baskets, grilles and components. They will not rust, unlike the stamped-steel basket frames that many manufacturers often use.

The rubber surround on KICKER Marine Speakers is the most UV-stable rubber available. This provides years of trouble-free use without fear of the brittle crumble that occurs as a result of using common foam surrounds.

The hardware that comes with KICKER Marine gear is stainless-steel – not inferior black-oxide steel or chrome-plated steel. Stainless commands a premium price, but it is the preferred material for all mechanical fasteners above the waterline on a boat, and the preferred material for KICKER Marine products. The use of stainless-steel hardware helps prevent rust and gel-coat staining. The paint finish on all KICKER Marine Speakers will hold and maintain its color regardless the extent of exposure to the environment. When you install them, they will be the same color next summer and for years to come.

KICKER REAL MARINE ELECTRONICS

KICKER Marine Power Amplifiers are developed from the ground up by KICKER engineers as authentic marine amplifiers, with key features to set the Real Marine series apart as a true amplifier line made for use in the outdoors.

KICKER Marine Amps feature circuit boards that are conformal-coated to completely seal and keep them dry from water and debris. All electrical connections and audio-specific controls are gasket-sealed to prevent damaging moisture intrusion. The KICKER Marine Amp's anodized-aluminum chassis uses an anodizing process that hardens the surface for the best protection in the open environment. They are assembled using rust-free, stainless-steel fasteners, which are also included for mounting.

KICKER Marine Media Centers are IP66-certified so water does no harm.

KICKER Marine Wire and Accessories set us apart from other industry brands. KICKER uses certified MRBF fuses and fuse holders. KICKER Marine power wire and speaker wire are also USCG/ABYC compliant. Your electronics are the last thing you want to worry about during a fun day on the surf, and KICKER Marine Wire and Accessories give you that piece of mind.

M-CLASS SPEAKERS

EXPERIENCE THE SOUND OF LUXURY

Our cutting-edge premium lineup caters to customers seeking superior sound quality and luxury in their marine-audio experience. We meticulously select state-of-the-art components and materials to meet the advanced design standards of Real Marine,[®] and each development decision is made to deliver unmatched sonic accuracy and performance for your boat.

- Carbon-fiber-infused midrange cones for highly accurate sound reproduction
- A carbon-fiber-infused polypropylene subwoofer cone co-molded to a tough TPE surround for a solid balance of durability and resonance control
- The bridge-mounted tweeters allow for a sealed midrange cone for greater weather resistance
- Glass-filled, nylon woofer-basket frames for outstanding thermal performance and toughness
- Weather- and UV-resistant, 28mm Teton[®] textile-dome, audiophile tweeters
- Internal Butterworth 12dB/octave crossovers for superior smoothness and protection
- RGBW LED lighting provides an added white channel for increased options

Implementing the ideal standards established for Real Marine[®] products, the M-Class guarantees the maximum in durability and performance, delivering precision quality designed specifically for the boating lifestyle with marine-compliant terminals, water-resistant materials, and meeting or exceeding ASTM standards for UV and salt/fog exposure (ASTM B117 200-hr. salt/fog testing and ASTM G154 400-hr. accelerated UV testing).

Teton is a registered trademark of TORAY INDUSTRIES.

MSLC RGBW LED CONTROLLER WITH REMOTE

NEW FOR
26

This base processor provides multi-function control of **RGB** or **RGBW** LED lighting, which is a necessity for the M-Class Premium lineup. Use the convenient dash-mounted remote dial for various functions. The MSLC has a number of useful attributes:

- Manages 17 different colors, including white, and five dynamic modes
- Allows for superior audio clarity with ultra-quiet circuitry
- Its high-current, 300 watts of continuous output enables it to drive multiple speakers and accessories
- Modes include Music, Flash, Pulse, Color-Change, and Solid

KMLC LED CONTROLLER

- Provides multi-function control of RGB LED lighting in KICKER Marine Speakers, Towers Systems, and Subwoofers
- Super-slim remote manages 20 different colors
- 19 dynamic modes, including adjustable brightness, fade, speed/strobe, and auto-save

M-CLASS PREMIUM SPEAKERS

Our designers created this premium set of midrange and high-frequency speakers to marry acoustic performance with durability, delivering fun and excitement throughout your cruise.

The MSS Component System Pack uses separate unique tweeters, precision midrange drivers, and integrated crossover protection for increased sonic accuracy.

Premium MSC Coaxial Speakers provide luxurious sound in familiar coaxial design. Install the Coaxial Speakers for the ultimate drop-in upgrades in your boat.

- Carbon-fiber-infused midrange cones for highly accurate sound reproduction
- Weather- and UV-resistant, 28mm Teton® textile-dome, audiophile tweeters
- Glass-filled nylon woofer baskets for excellent thermal performance and toughness
- Internal Butterworth 12dB/octave crossovers for superior smoothness and protection
- Corrosion-resistant, water-proof connectors for speakers and lighting
- Equipped with RGBW LED lighting for endless colors
- Includes both white and charcoal grilles

speaker size: in, mm . power handling: watts PEAK/RMS . frequency response in Hz . Power handling assumes typical music program with minimal clipping; varies with enclosure size. See your KICKER dealer for complete details.

M-CLASS PREMIUM SUBWOOFERS

For the next level of bass response in your boat, the only way to go is KICKER MW Premium Marine Subwoofers. These bass-makers are designed to wear the Real Marine® badge. Drive the MW Subwoofer to extremes – and it will provide the crew with extraordinary reliability and performance.

Choose Premium MWE Subwoofers if you love the tight, accurate bass response that a small, sealed or vented enclosure can provide.

If your space is limited, then you want the Premium MWF Freeair™ Subwoofer for big bass without the need for an enclosure.

Premium MW Subs come in two sizes, the largest one offering 500 watts (RMS) of power handling for big deep bass on the cruise.

- The MWE Subwoofer is designed for use in a sealed or vented enclosure for tight, most accurate bass
- The MWF Freeair Subwoofer is designed to give you big bass without the need for an enclosure (baffle may require a backing plate)
- Utilizes a carbon-fiber-infused poly-cone co-molded to a tough TPE surround for a solid balance of durability and resonance control
- Glass-filled nylon basket frames for excellent thermal performance and toughness
- Corrosion-resistant, water-proof connectors for speakers and lighting
- Equipped with RGBW LED lighting for endless colors
- Includes a charcoal grille (the MWGW white grille is available and sold separately)
- **Now available in 2- or 4-Ohm**

KICKER Premium Marine gear features key moisture-deterring characteristics that set them apart as products truly built to use in the outdoors – it's all Real Marine. Real Marine means you have confidence and peace of mind. Premium Marine Speakers are weather-proof, undergoing rigorous testing to ensure it meets or exceeds marine industry standards. (ASTM B117 and ASTM G154 testing; ISO 12216:2002 D 1.1-2).

M-CLASS PREMIUM LOADED SUBWOOFER ENCLOSURE

Drive the MWLE Loaded Subwoofer Enclosure to extremes. Install the MWLE Enclosure for the best sound in your boat – up-firing or front-firing subwoofers projecting the loudest bass possible, or even down-firing for the deepest bass that vibrates the deck.

This marinized enclosure is ready to go right out of the box, utilizing a 10-inch MWE Premium Subwoofer and a custom-tuned, 10-inch reFLEX™ passive subwoofer.

MW Subwoofers utilize water-proof connections for flawless signal transfer, a stiff weather-resistant, carbon-fiber-infused poly-cone with a co-molded TPE surround, and ribbed silicone gasketing for a complete weather-proof seal. The MWLE utilizes an extremely tough, molded all-weather enclosure with lockable mounting feet, and it includes a pair of charcoal, UV-resistant grilles. You can change them out for MWGW white grilles by contacting your KICKER dealer (sold separately).

- The MWLE is designed with a Premium MWE Subwoofer paired with a passive reFLEX™ subwoofer for tight accurate bass
- The MW Subwoofer utilizes a carbon-fiber-infused poly-cone co-molded to a tough TPE surround for a solid balance of durability and resonance control
- Equipped with RGBW LED lighting for endless colors
- Includes charcoal grilles (MWGW white grilles are available and sold separately)
- KICKER Real Marine® designed specifically for marine environments with splash- and-spray resistance and superior weather resistance
- **Now available in 2- or 4-Ohm**

speaker size: in, mm . power handling: watts PEAK/RMS . frequency response in Hz . Power handling assumes typical music program with minimal clipping; varies with enclosure size. See your KICKER dealer for complete details.

TOWER SYSTEMS

GO 
OVERBOARD!

KMTC/KMFC

HLCD TOWER SYSTEMS

Your boat becomes a floating concert with KMTC and KMFC HLCD (horn-loaded compression driver) tower speakers. Available in black or white, these speakers deliver exceptional clarity and concert-level volume! You've never heard this combination of volume and clarity before. Each 9- and 11-inch coaxial driver carries a proprietary horn design, made to sound incredibly loud and smooth – whether you're on the deck or at the end of a tow rope.

On the KMTC, the innovative enclosure clamp is made of 316L stainless steel and houses both the speaker and LED cables – protecting them from the elements in a specialized mating socket.

The near full-rotation speaker design allows your music to play anywhere, any time. Simply flip the integrated toggle and turn the speaker to aim your music where you want it.

Easily bring your speakers from the house to your boat, thanks to KICKER's revolutionary in-clamp wiring system. Disconnecting wires is a thing of the past – no tools required!

KMFC Horn-Loaded Tower Systems provide another way to mount your cans, made for standard, flat factory tower-speaker hardpoints with 2.5-inch bolt spacing and hidden wires.

Light up the night with standard LED illumination. Seven vibrant colors let you match the speakers to your boat's color scheme, or upgrade to 20 colors and 19 wild lighting modes with the optional KMLC controller and wireless remote.

*ASTM B117 200 hr. Salt Fog Test
*ASTM G154 400 hr. Accelerated UV Test

- Horn-loaded, compression-driver (HLCD), high-efficiency system
- Advanced horn design delivers natural-sounding, high- frequency response
- Includes 1.4-inch (35mm) aluminum-diaphragm compression drivers
- LED-infused enclosures
- KMTC has a swiveling design and quick-disconnect socket
- KMFC uses standard, flat factory hardpoints to mount

speaker size: in, mm . power handling: watts PEAK/RMS . frequency response in Hz . Power handling assumes typical music program with minimal clipping; varies with enclosure size. See your KICKER dealer for complete details.

KMTC/KMFC COAXIAL TOWER SYSTEMS

KMTC8 coaxial tower systems come loaded with powerful 8-inch midranges and 1-inch PEI tweeters. A single or dual 6-1/2-inch version with 3/4-inch PEI-dome tweeters is also available in the KMTC65 and KMTDC65 models. The injection-molded polypropylene speaker cones are UV-treated and matched with Santoprene® surrounds for excellent sound quality and durability in any weather. Mounting hardware is forged from rustproof, 316L stainless-steel.

Our molded ABS enclosures are made for long life on the water. The UV-resistant finish is anti-fading and anti-corrosion, with a proprietary design that produces outstanding sound quality in open-air environments.

A revolutionary, near full-rotation swivel clamp lets you aim your music anywhere, anytime – with no tools required. The stainless-steel clamp automatically adapts to tube sizes ranging from 1-1/2 to 3-1/4 inches – vertically or horizontally, while the through-clamp wiring and integrated speaker/LED connectors create a clean look without binding posts.

ASTM Salt/Fog* and UV**--certified, all KMTC tower speakers meet or exceed industry standards.

With customizable LED lighting included, your speakers can match your boat's theme. Twenty color options as well as 19 dynamic modes are available when using the optional KMLC remote.

Check into KMFC Flat-Surface-Mount Cans that are made specifically for installation on a flat surface, using the provided hardware to mount either flat or angled, or pitched up or down 5° or 10°.

*ASTM B117 200 hr. Salt Fog Test
**ASTM G154 400 hr. Accelerated UV Test

- Marine LED-infused coaxials loaded in dual or single tower pairs
- One model with swiveling design and locking toggle (KMTC)
- Other model includes hardware to mount to any flat surfaces (KMFC)
- Available in black or white

KM EMPTY TOWER ENCLOSURES

KMTES and KMTED enclosures are available in black and white. Both models accept all KICKER 8-inch, 6-1/2 or 6-3/4-inch component speakers, coaxials and horns. They include slotted mounting holes for different bolt patterns, stainless-steel screw-type connectors and come with aluminum tower-pipe clamps (2-5/8") with three other adapter sizes (2-1/4", 2-3/8", 2-1/4"). The KMTAP adapter pack that fits more pipe diameters is sold separately – ask your dealer.

The 4-inch KMMTES Tower Enclosures were designed to house the KICKER KM4 4-inch coaxial speakers. They provide two mounting options: a regular, straight base mount or an off-set bracket for angular mounting. The off-set bracket allows the enclosures to rotate, pointing sound directly to the listener’s ears for an optimum listening experience. Available in black or white.

The KMMTES speaker enclosures all include acoustic poly-fill for the clearest sound, all mounting hardware, and fit tubing sizes 7/8-inch to 1-1/4-inch round or 1-inch square. The molded ABS enclosures, boasting bold cosmetics and contrasting accent details, complement KICKER’s Marine speaker lineup.

- Works with any KICKER coaxials
- Billet-aluminum mounting brackets and adapter inserts
- Available in black or white

KMXL

HORN-LOADED COAXIAL SPEAKERS

The KMXL is all about performance. Powerful neodymium magnets power these speakers to cut through the wind, waves and motor noise with ease. The integrated LED lighting, compression drivers, a proprietary horn design and that powerful KICKER sound make for an incredibly loud and smooth speaker system generated in KICKER labs.

Made to thrive outdoors on boat or land, KMXL HLCD speakers come with UV-treated cloth surrounds, a tough nylon basket and waterproof cones to withstand the sun without cracking or fading. On water, you can flush-mount these speakers nearly anywhere on your boat, or load the 6.5-inch or 8-inch pairs into KM-Series Empty Enclosures to have tower cans with serious power!

The music on your cruise should stir the soul. Designed at our Stillwater, Oklahoma headquarters to KICKER's exacting standards, KMXLs are crystal clear and loud, adding powerful sound to your adventure. All-weather-grade speaker construction ensures years of sound through the wind and rain.

All models of KICKER Marine Coaxials meet or exceed industry standards for environmental humidity and corrosion,* and for material degradation due to UV exposure.** UV treatments on the coaxial's cones, baskets and grilles help all models to maintain integrity in marine environments. These speakers can endure most any weather conditions with splash-and-spray-resistant, sealed motors and locking terminal covers. Speaker hardware is forged from rustproof, 316L stainless steel.

*ASTM B117 200 hr. Salt Fog Test
**ASTM G154 400 hr. Accelerated UV Test

- High-volume, horn-loaded compression drivers with grilles
- High-efficiency, louder volume
- Integrated multi-color LED lighting

KM-SERIES COAXIAL SPEAKERS

Boaters everywhere will enjoy KM-Series Marine Coaxial Speakers, with both charcoal and white grilles. They retain all the spectacular highs and lows for which KICKER Speaker Systems are known, with the added convenience of multiple size options to fit virtually any application. Designed for the simplest of speaker installations, it's a breeze to get live-quality, full-range audio designed specifically for a marine environment.

The KM4 packs a lot of power into a pair of 4-inch midrange speakers and quality 1/2-inch tweeters. Available in either 2-or 4-Ohm models, it fits perfectly into KICKER KMMTES 4-inch Empty Enclosures for boat towers (sold separately). KM4 comes standard with both white and charcoal grilles.

The KM65 includes two 6-1/2-inch midrange speakers and 3/4-inch tweeters. The KM65 is available with or without RGB LED lighting with both white and charcoal grilles.

The KM8 is similar in color, available in 4-Ohm, and the 8-inch mids and 1-inch tweeters will brighten any boating experience with multi-color LED lights that can be changed to fit your mood. The KM8 comes standard with both white and charcoal grilles.

All models of KICKER Marine Coaxials meet or exceed industry standards for environmental humidity and corrosion* and for material degradation due to UV exposure.** UV treatments on the coaxials' injection-molded cones, Santoprene® surrounds, baskets and grilles help all models to maintain in marine environments, These speakers can endure most any weather conditions with splash-and spray-resisting sealed motors, cones and locking terminal covers. Speaker hardware is forged from rustproof, 316L stainless-steel.

L7S™
SUBWOOFERS

The L7S™ is a cutting-edge, square-sub design from the award-winning KICKER Solo-Baric® line that is the most recognizable woofer in the industry. The unique design ultimately means more cone area, more air displacement and more raw bass than a conventional round subwoofer. And when installed in its optimum sealed enclosure, the L7S is weather-resistant for all fresh-water applications.

The L7S handles huge power and provides extreme output. The dual-voice-coil terminals are satin nickel-plated and spring-loaded for an attractive, reliable connection to larger gauge wire. The heavy-duty ribbon tinsel leads take your amplifier's power through a semi-progressive spider to voice coils equipped with high-temp copper windings, engineered to handle intense heat easily while delivering extraordinary power levels. To dissipate any excess heat, KICKER's UniPlate™ black plate and pole piece represent a single, solid unit, allowing heat to move away from the motor. Venting below the spider allows air to move and heat to escape.

You want grace under pressure. With patented corner-ribs to minimize distortion and a blue-stitched Santoprene® surround helping to hold the massive cone structure in place, the L7S provides durability at high excursion without compromising sound quality.

In addition to the stable structure, the L7S revolves around KICKER's most advanced cone design, the injection-molded SoloKon™, which adds targeted strength for reliable performance and accurate response. The 360-degree, constant-contact back bracing adheres directly to every contour of the SoloKon square cone, maximizing the mechanical coupling of the motor while making the woofer as strong and responsive as possible.

- Patented square-cone tech for more bass than same-sized round sub
- Outstanding sound quality and high power handling
- Ultra-rigid, one-piece SoloKon with vented, 360-degree back bracing
- Extreme durability in fresh-water applications only (not recommended for salt water)

KM-SERIES SUBWOOFERS

The eight KICKER KM Marine Subwoofers deliver superior bass, with or without an enclosure. Co-molded woofer cones and butyl surrounds create a superior seal, while tooled polycarbonate baskets, front and rear gasketing, and ASTM salt/fog* and UV**certification make this one of the loudest, longest lasting subs you'll ever put on your boat.

Made to thrive on the water, KM subs are equipped with a splash-resistant, sealed motor structure and locking terminal cover, so the beating heart of the sub is kept perfectly dry and playing hard!

KMF Freeair Subwoofers are perfect for creating big bass without an enclosure. As weatherproof and marine-ready as their KM cousins, all you have to do is mount and power them. Instant bass!

KICKER KM Subwoofers thrive in a sealed or vented enclosure. You get the solid, weatherproof low-end you need to feel the beat on your boat.

Both KM Subwoofer styles are now available in two sizes (10- and 12-inch) and two impedances (2- or 4-Ohm single voice coil) for the flexibility to design your system, your way.

*ASTM B117 200 hr. Salt Fog Test
**ASTM G154 400 hr. Accelerated UV Test

- KM designed specifically for sealed or ported enclosures
- KMF designed specifically for freeair applications
- Charcoal or White grilles featuring multi-color LED lighting sold separately

KM-SERIES SUBWOOFER LED GRILLES (SOLD SEPARATELY)

- Made for KM/KMF 10- and 12-inch subwoofers, these grilles protect—brilliantly! RGB LED-equipped and molded from thick ABS plastic, the grilles come in white or charcoal.
- Perfect for fresh and salt water, these water-proof grilles provide years of protection for your bass, while thick silicone-coated LEDs give your boat an added flair!

POWER AMPLIFIERS

GO
OVERBOARD!

KXMA-SERIES
MARINE POWER AMPLIFIERS

The KXMA-Series takes proven technologies and advanced components to the water. These weather-resistant marine amps utilize class-leading features for unbelievable sound in the boating environment, in the most compact chassis to date.

KXMA-Series Marine Amplifiers are available in seven models: a 900-watt, hybrid 5-channel amp for a full system solution; two-channel amplifiers with up to 1,200 watts of power; a pair of 4-channel amplifiers with up to 800 watts of power; a massive 8-channel, 800-watt amplifier; and an immense 1500-watt mono amp for bass. All seven KICKER marine power units utilize Class-D amplification for the best in efficiency, flexibility and sound quality without draining your boat's battery.

The five-channel KXMA900.5 and KXMA1500.1 include 1-Ohm stability and KickEQ+™ parametric bass boost. A variable subsonic filter is also included to make your bass powerful, accurate and ultra-reliable!

KXMA-Series Amps are built for playing outdoors, like any KICKER Real Marine product. Power, speaker and input connections are gasket-sealed, as is the control cover, for a water-resistant barrier to key components. The internal circuit boards are protected by a conformal coating for water and dirt resistance, plus all power connections meet or exceed USCG/ABYC standards.

Stainless-steel mounting hardware prevents rust stains on carpeting and gel coat, and the chassis' anodized finish battles harsh solar rays. They feature an optimized circuit layout for the most efficient use of components, the smallest footprint and clearest sound quality. KXMA-Series Amplifiers also come loaded with variable active crossover and digital preamplifier.

- Superior sound quality and weather-resistant power
- KXMA900.5 amp with sub channel stable to 1 Ohm
- KICKER Real Marine means it's made specifically for marine use
- New KXMA1500.1 provides big bass power

KMA-SERIES MARINE POWER AMPLIFIERS

KMA-Series Marine Amplifiers are an affordable way to get KICKER power on the water. Available in five flexible models, the KM line offers up to 800 watts of power in a mono amp as well as a two, four and super-flexible six-channel amps! Purpose-built for your boat, every KM amp comes complete with marine-grade speaker terminals, stainless-steel screws, conformal-coated circuit boards and USCG/ABYC-compliant power connections – KICKER Real Marine in every way.

A variable 12dB crossover controls the sonic response of your speakers, while a 24dB subsonic filter on the 1-Ohm stable KMA800.1 and the KMA600.6 actively filters out damaging ultra-low frequencies. The amplifiers are also equipped with KicEQ™ variable bass boost.

The KMA600.6 powers up to three independent full-range zones. Whether you’re swimming, wakeboarding or tubing, this six-channel 600-watt amp gives you an easy way to get the perfect volume levels in the water and on the boat at the same time.

- Reliable, weather-resistant power and performance
- KICKER Real Marine with with USCG/ABYC-compliant features
- Three-zone capability with the KMA600.6
- Completely updated and improved from the KICKER original KM line

MEDIA CENTERS

GO
OVERBOARD!

KMC5 PREMIUM MEDIA CENTER

Providing the ultimate fun for your cruise, KICKER’s premier KMC5 Media Center features six channels of built-in power, delivering up to 240 watts to your speakers! It’s equipped with an AM/FM/satellite-radio/weather-band tuner, charging USB connection and four sets of RCA outputs for easy expansion.

Your KMC5 comes with a sunlight-viewable, full color 3.5-inch LCD screen, rotary encoder and 240 watts of peak power into six channels. Add even more bump to your boat by adding amplifiers to the front, rear, subwoofer and Zone-2 RCA outputs.

Exclusive to the KMC5, the included video input can be configured in a variety of ways. Monitor your rider at the end of the rope, use it as a backup camera, even use it as a video baby monitor! The video input can be toggled with either a trigger wire or a button push.

Pair your Bluetooth to the KMC5, plug into the USB or RCA inputs, or turn on the AM/FM or satellite radio. Add a KRC55 Digital Remote or a KRC12 Remote Commander for even more control. This durable Media Center is ready for some fun on the water!

- Video input is provided for use with backup or tower cameras, or other sources
- NMEA® 2000-compatible
- “Zone 2” provides independent volume control of a separate listening area
- Satellite-radio ready
- Add the KRC55 Digital Remote for convenience and control of listening zones

KMC4

KMC4 DUAL-ZONE MEDIA CENTER

Meet your new entertainment hub! The KMC4 features a mic and hardware for hands-free calling, and four channels and up to 160 watts of built-in power. It comes equipped with an AM/FM/Bluetooth/weather-band tuner, charging USB connection and four sets of RCA outputs for easy expansion.

The KMC4 comes with a sunlight-viewable, full-color 3-inch LCD screen and a rotary encoder for easy access to your tunes. Add even more bump to your boat by connecting KICKER Marine Amplifiers to the front, rear, sub and Zone-2 RCA outputs. The KMC4 is ready for any music you want to play with the full-color display showing you on-screen artist, album art, track and title data.

- “Zone 2” provides independent volume control of a separate listening area
- Up to 10 favorites for each source
- Add a wired KICKER KRC12 Remote Commander for more control

KMC5

KMC2 GAUGE MEDIA CENTER/

KMC3 ALL-IN-ONE MEDIA CENTER

2 looks – one great tuner!

The KMC3 and KMC2 Media Centers are made specially for marine and outdoor use, equipped with an AM/FM tuner and large, backlit buttons that let you adjust power, volume, seek, tuning, pause/play and mute. Built-in Bluetooth® easily pairs with your device for wireless music streaming from up to 30 feet away. With USB charging and RCA aux-inputs standard, these receivers are ready to play virtually any source you want – whenever you want. The built-in, 72-watt (RMS) amplifier delivers as much as 20 watts per channel into four channels. A full-range RCA output lets you connect KICKER marine amplifiers to the system, for an even bigger party!

Using a clever APS (auto preset system), the KMC3 and KMC2 automatically memorize the strongest radio stations in your immediate area. Customize your sound with user-definable equalizer settings, or use one of the convenient pre-made settings for rock, classical, flat or pop. The bass, treble, balance and fader are always adjustable with the press of a button.

The anti-glare LCD display lets you view information during all times of the day and weather. As with all KICKER Marine gear, the KMC3 and KMC2 are UV- and salt/fog-rated for long life and includes stainless-steel hardware for a flawless installation that lasts.

- AM/FM/USB/Bluetooth streaming receiver
- Anti-glare LCD display for day or night
- Customizable EQ with four supplied presets

KXMARLC

ZONE VOLUME CONTROLLER

Get precise volume control in up to four independent zones of your boat! This universal zone control distributes a stereo RCA signal from your source unit to as many as four independent stereo RCA outputs. The built-in line driver delivers up to an eight-volt signal to each channel for maximum amplifier output.

- Four independent zone controls
- Base processor unit and four-zone remote controller included
- Compatible with all amplifiers
- Customizable zone labels included

Rated Output Per Channel, All Channels Driven (1KHz,14.4 VDC, THD < 1%): 8v
Frequency Response Hz (± 1dB): 20-20,000
Input Sensitivity (VAC): 4.0 - 0.125
Signal to Noise Ratio @ Rated Power [dB]: 100
Input Impedance [Ohm]: 10k
Output Impedance [Ohm]: 100k

KRC12

REMOTE COMMANDER

(use with all KICKER Media Centers)

Control your music from anywhere on the boat with the KRC12 Wired Remote Commander. Whether you're topside or in the cabin, this flexible remote lets you instantly change the source, volume and track with the press of a button. Comes with its own 25-foot cable, and provides a simple one-wire hook-up.

KRC55

DIGITAL REMOTE (FOR KMC5 ONLY)

For use only with the KICKER KMC5 Premium Media Center, the KRC55 is a must-add to put you in the driver's seat from anywhere you want to mount it.

Whether you're topside or in the cabin of your boat, or even in back of your UTV, this flexible remote lets you instantly change the KMC5's source, volume, track and favorites from a bright two-line LCD display. Use the KICKER KRCEXT25 Extension Cable to connect directly to your KMC5, and connect multiple KRC55s to it with a KICKER KRCY1 Y-Adapter.

(KRCEXT25 and KRCY1 sold separately)

KRCY1 Y-Cable Splitter lets you add multiple KRC55 Remotes around your boat (a KRCEXT25 is needed for each remote).

KRCEXT25 provides 25 feet of cable from your KMC5 Media Center to reach the KRC55 Remote and the farthest corners of your boat.

WIRE AND ACCESSORIES

KICKER Marine Power and Signal Accessories are a complete wiring solution, built to the highest standards in the marine industry. KICKER only designs and builds USCG (U.S. Coast Guard) and ABYC (American Boat and Yacht Council)-compliant accessory products. To ensure maximum power transfer and reliability, KICKER uses pure, full-spec OFC copper wire that is tinned to prevent corrosion.

MARINE POWER WIRE

To ensure maximum power transfer and reliability, KICKER takes pure, full-spec OFC copper wire is tinned to prevent corrosion. Compliant with Coast Guard and ABYC standards, the power cable features soft, flexible jacketing that makes installation easy, even when running cable around corners.

SPEAKER/RGB COMBO AND RGBW LED WIRE

Engineered to withstand the toughest marine environments, the KMWRGB150 (speaker/RGB combo) and MSRGBW150 (RGBW LED) spools feature purpose-built wire for LED lighting flexibility. KMWRGB is a speaker-and-lighting-wire combo, in a single jacket. The five-conductor, lighting-only MSRGBW spool provides the RGBW white channel to work with KICKER M-Class Premium gear and RGBWDB Distribution Block. The large 18 AWG wire aids in preventing voltage sag and meets USCG standards for wiring in new boats.

MARINE INTERCONNECTS

KICKER Marine Interconnects are purpose-made for life on the water. The RCA cables feature split-pin connections and OFC wire for superior bass response and signal clarity. The PVC jacketing is extended to completely cover the ground ring, providing a superior seal between the elements and your amplifier. All marine RCA cables feature an ultra-slim union for snag-free cable routing in tight places.

RGBWDB DISTRIBUTION BLOCK

The RGBWDB provides a central “hub” for termination of RGB and RGBW lighting wiring, which is standard on KICKER’s Premium Marine gear. It’s a single, simple tool allowing you to terminate effectively, neatly, and efficiently all your RGB/RGBW lighting wires without any light-controller noise radiating into your sound. It features a color-coordinated set of tinned-brass bus bars, and a clear acrylic cover to help prevent accidental short circuits. Use with Premium Marine Speakers and MSRGBW Combo Wire.

MARINE POWER DISTRIBUTION

When it comes to powering your boat’s amplifiers, keeping your cabling safe means keeping your passengers safe. KICKER is the only 12-volt aftermarket brand to offer a power distribution system that meets Coast Guard and ABYC standards, and is so safe it can be used in new boat construction. KICKER’s MRBF fuses also meet SAE-J1171 standards for ignition protection, and are IP66 rated.

MARINE POWER KITS

Get all the power you need in this convenient marine amp kit. Available in 4 and 8 AWG options, the kits come complete with fuse, fuse holder, power and ground cabling, plus remote wire.

Ask your Sales Rep about Marine items

MODEL [at 14.4V]:	KXMA400.2	KXMA1200.2	KXMA500.4	KXMA800.4
POWER [watts/ch], 2 OHM STEREO	200 x 2	600 x 2	125 x 4	200 x 4
POWER [watts/ch], 4 OHM BRIDGED MONO:	400 x 1	N/A	250 x 2	400 x 2
DYNAMIC POWER [watts]:	500	1500	700	1100
COMES WITH WIRED REMOTE:	No	No	No	No
DIMS [in] all models 2-1/8H x 8-5/16W x ...L	9-9/16	11-3/16	11-3/16	11-9/16
DIMS [cm] all models 5.4H x 21.0W x ...L	24.4	28.4	28.4	29.4
FREQUENCY RESPONSE [Hz]:	10-20k, +0/-1dB	10-20k, +0/-1dB	10-20k, +0/-1dB	10-20k, +0/-1dB
INPUT SENSITIVITY:	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V
SIGNAL-TO-NOISE RATIO:	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power
ACTIVE CROSSOVER:	24dB/octave, Off/variable high pass 10-500Hz, variable low pass 40-500Hz (400-5kHz w/ 10x switch), band pass capable	24dB/octave, Off/variable high pass 10-500Hz, variable low pass 40-500Hz (400-5kHz w/ 10x switch), band pass capable	(amp 1) 24dB/octave, variable 10-5kHz w/ 10x switch, selectable high pass, low pass or all pass; (amp 2) 24dB/ octave, variable high pass 10-500Hz, variable low pass 40-5kHz w/10x switch, selectable high pass, low pass, all pass or band pass	(amp 1) 24dB/octave, variable 10-5kHz w/ 10x switch, selectable high pass, low pass or all pass; (amp 2) 24dB/octave, variable high pass 10-500Hz, variable low pass 40-5kHz w/10x switch, selectable high pass, low pass, all pass or band pass
KicEQ BOOST:	Variable 0-6dB, centered @ 40Hz	Variable 0-6dB, centered @ 40Hz	Variable 0-6dB, centered @ 40Hz (amps 1 and 2)	Variable 0-6dB, centered @ 40Hz (amps 1 and 2)

KMA-SERIES

MODEL [at 14.4V] :	KMA150.2	KMA360.4	KMA600.6	KMA800.1	KMA600.4
POWER [watts/ch], 2 OHM STEREO	75 x 2	90 x 4	100 x 6	N/A	150 x 4
POWER [watts/ch], 4 OHM BRIDGED MONO:	150 x 1	180 x 2	200 x 3	N/A	300 x 2
POWER [watts/ch], 1 OHM MONO:	N/A	N/A	N/A	800 x 1	N/A
DYNAMIC POWER [watts]	190	500	750	1200	725
COMES WITH WIRED REMOTE:	No	No	No	Yes	No
DIMS [in] all models 2-5/16H x 7-1/8W x ...L	8-1/16	12-7/16	13-15/16	8-1/16	12-7/16
DIMS [cm] all models 5.9H x 18.0W x ...L	20.4	31.5	35.3	20.5	31.5
FREQUENCY RESPONSE [Hz]:	10-20k, +0/-1dB	10-20k, +0/-1dB	10-20k, +0/-1dB	25-200, +0/-3dB	10-20k, +0/-1dB
INPUT SENSITIVITY:	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-101V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V
SIGNAL-TO-NOISE RATIO:	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power
ACTIVE CROSSOVER:	12dB/octave, variable 50-200Hz, selectable high pass, low pass or all pass	12dB/octave, variable 50-200Hz, selectable high pass, low pass or all pass	(amp 1 and amp 2) 12dB/octave, variable 0-200Hz, HP only; (amp 3) 12dB/octave, variable 50-200Hz, Off/HP/LP	12dB/octave, variable 50-200Hz, low pass only	12dB/octave, variable 50-200Hz, selectable high pass, low pass or all pass
SUBSONIC FILTER	N/A	N/A	(amp 3 only) 24dB/octave, high pass fixed @ 25Hz	24dB/octave high pass fixed @ 25Hz	N/A
KicEQ™ BOOST	Variable 0-6dB, centered @ 40Hz	Variable to 0-6dB, centered @ 40Hz	(amp 3 only) Variable 0-6dB, centered @ 40Hz	Variable 0-6dB, centered @ 40Hz	Variable to 0-6dB, centered @ 40Hz

KXMA-SERIES

MODEL [at 14.4V]:	KXMA800.8	KXMA900.5	KXMA1500.1
POWER [watts/ch], 2 OHM STEREO	100 x 8	125 x 4	N/A
POWER [watts/ch], 4 OHM BRIDGED MONO:	200 x 4	250 x 2	N/A
POWER [watts/ch], CLASS D 1 OHM MONO:	N/A	400 x 1, +/-10%	1500 x 1 +/- 10%
POWER [watts/ch], CLASS D 4 OHM MONO (@ 14.4v, <1% THD):	N/A	N/A	750 x 1
DYNAMIC POWER [watts]:	1200	1300	2500
COMES WITH WIRED REMOTE:	No	Yes	Yes
DIMS [in] all models 2-1/8H x 8-5/16W x ...L	14-3/4	12-3/4	W= 7-7/16, L= 11-3/16
DIMS [cm] all models 5.4H x 21.0W x ...L	37.4	32.4	W= 18.9, L= 28.4
FREQUENCY RESPONSE [Hz]:	10-20k, +0/-1dB	(amp 1&2) 10-20k, +0/-1dB; (mono) 10-160	10-160
INPUT SENSITIVITY:	High Level 250mV-10V, Low Level 125mV-5V	High Level 250mV-10V, Low Level 125mV-5V	High level 250mV-10V Low level 125mV-5V
SIGNAL-TO-NOISE RATIO:	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power	>95dB, a-weighted, re: rated power
ACTIVE CROSSOVER:	(amp 1 and amp 2) 24dB/octave, Off/HP/LP, variable 10-5kHz w/ 10x switch; (amp 3 and amp 4) 24dB/ octave, Off/HP/LP/BP, variable HP 10-500Hz; variable LP, 40-5kHz w/ 10x switch	Full-Range - (amp 1) 24dB/octave, variable 10-5kHz w/ 10x switch, selectable high pass, low pass or all pass; (amp 2) 24dB/octave, variable high pass 10-500Hz, variable low pass 40-5kHz w/ 10x switch, selectable high pass, low pass, all pass or band pass; Sub Ch. - 24dB/octave, variable 40-160Hz low pass only	LP only, variable 40-160Hz, 24dB/octave
SUBSONIC FILTER [KXMA.5 / KXMA.1]:	N/A	(mono only) High-pass variable 10-80Hz	Variable 10-80Hz, 24dB/octave
KicEQ BOOST:	Variable 0-6dB, centered @ 40Hz (amps 1, 2, 3 and 4)	(mono only) Variable 0-6dB, centered 40Hz	Variable 0-6dB, centered @ 40Hz

RMS Power test @ 14.4v @ </- 1% THD+N, Audio Precision® APx500 analyzer, see “www.kicker.com/amp-power-testing” for details.
