Accredited training for your business

Dementia Awareness

An introduction to dementia care. This course aims to give an understanding of the most common types of dementia and the signs and symptoms experienced by a person living with dementia.

The immersive course will help delegates to experience the feelings, emotions and frustrations experienced, alongside the barriers to communication. This is created through roleplay and sensory simulation.

By the end of the course, delegates will have a better understanding of how to support and care for someone living with dementia, enabling them to use a more creative and supportive approach.
