- ✔ COVID-19
- ✔ MOLD
- ✔ BACTERIA
- ✔ FUNGI
- ✔ MILDEW
- ✔ ALLERGENS

The only solution that gives the public the peace of mind, through continuous protection, to comfortably go back to public places of business like casinos, restaurants, and bars.

Knowing that surfaces are continuously virus free, relieves the fear of sitting down at a table to play, using slot machines, touching the counters at bars, back of house offices, elevator buttons, and stair rails.

### OUR PRODUCTS

**mPale™ Antimicrobial Cleaning Agent**  
EPA Registered No. 1839-79-83129

**mPerial™ Detergent/Disinfectant**  
EPA Registered No. 1839-79-83129

Finding the right sanitation product for all around casino use is just half the battle, the other half, is giving players the confidence in the health and safety of the “new normal” gaming experience. For this you need a Vendor who is willing and able to partner with you to inform the public of your efforts to “double down”, for their health and safety and we at **BioCorpsUSA**, want to be that partner.

To that end we will engage with you in a robust advertising program promoting your “Protecting Players Health” campaign, including:

Self-adhering decals to be applied to the back of seats and surfaces, informing the public of the always on, continuous clean safe to touch, surface sanitization by BioCorps, with the tag line “Protecting Players Health, See How” with a QR code scannable symbol, which takes the player to a video message from your Casino. The production, at our expense, of a up to one minute, broadcast standard quality video presentation message, showing how your Casino has doubled down to keep players and employees safe in these unusual times. Content at your discretion and mainstream media plus much more.

# THE ONLY LONG TERM SOLUTION THAT INHIBITS ALL MICROBIAL GROWTH

## HOW IT WORKS

### THE SOLUTION IS THE CORPS, BIOCORPS

mPale™, The mPact Antimicrobial Cleaning System is our exclusive two step process that kills and prevents the spread of virus, mold and bacteria not with poison, but by puncturing cell walls on a microscopic level. mPale's unique spiked molecular structure is imperceptible to human touch but is highly effective against virtually all virus, including Covid-19, influenza, molds, and most bacteria. This patented technology, registered with the EPA. mPact™ Antimicrobial Cleaning System is available only through BioCorps, USA.

mPale™ Antimicrobial is colorless, odorless, and can be applied to wood or steel framing, sheet-rock, carpets, upholstery, and painted surfaces. The real beauty of this product is that, once it is sprayed on, it bonds to the surface and retains its effectiveness for up to 30 days.
