

# INSPIRATIONS

## THE EYE

Our eyelids open and shut, irises expand and contract to adapt to the environment, controlling what we see and how much light we let in.

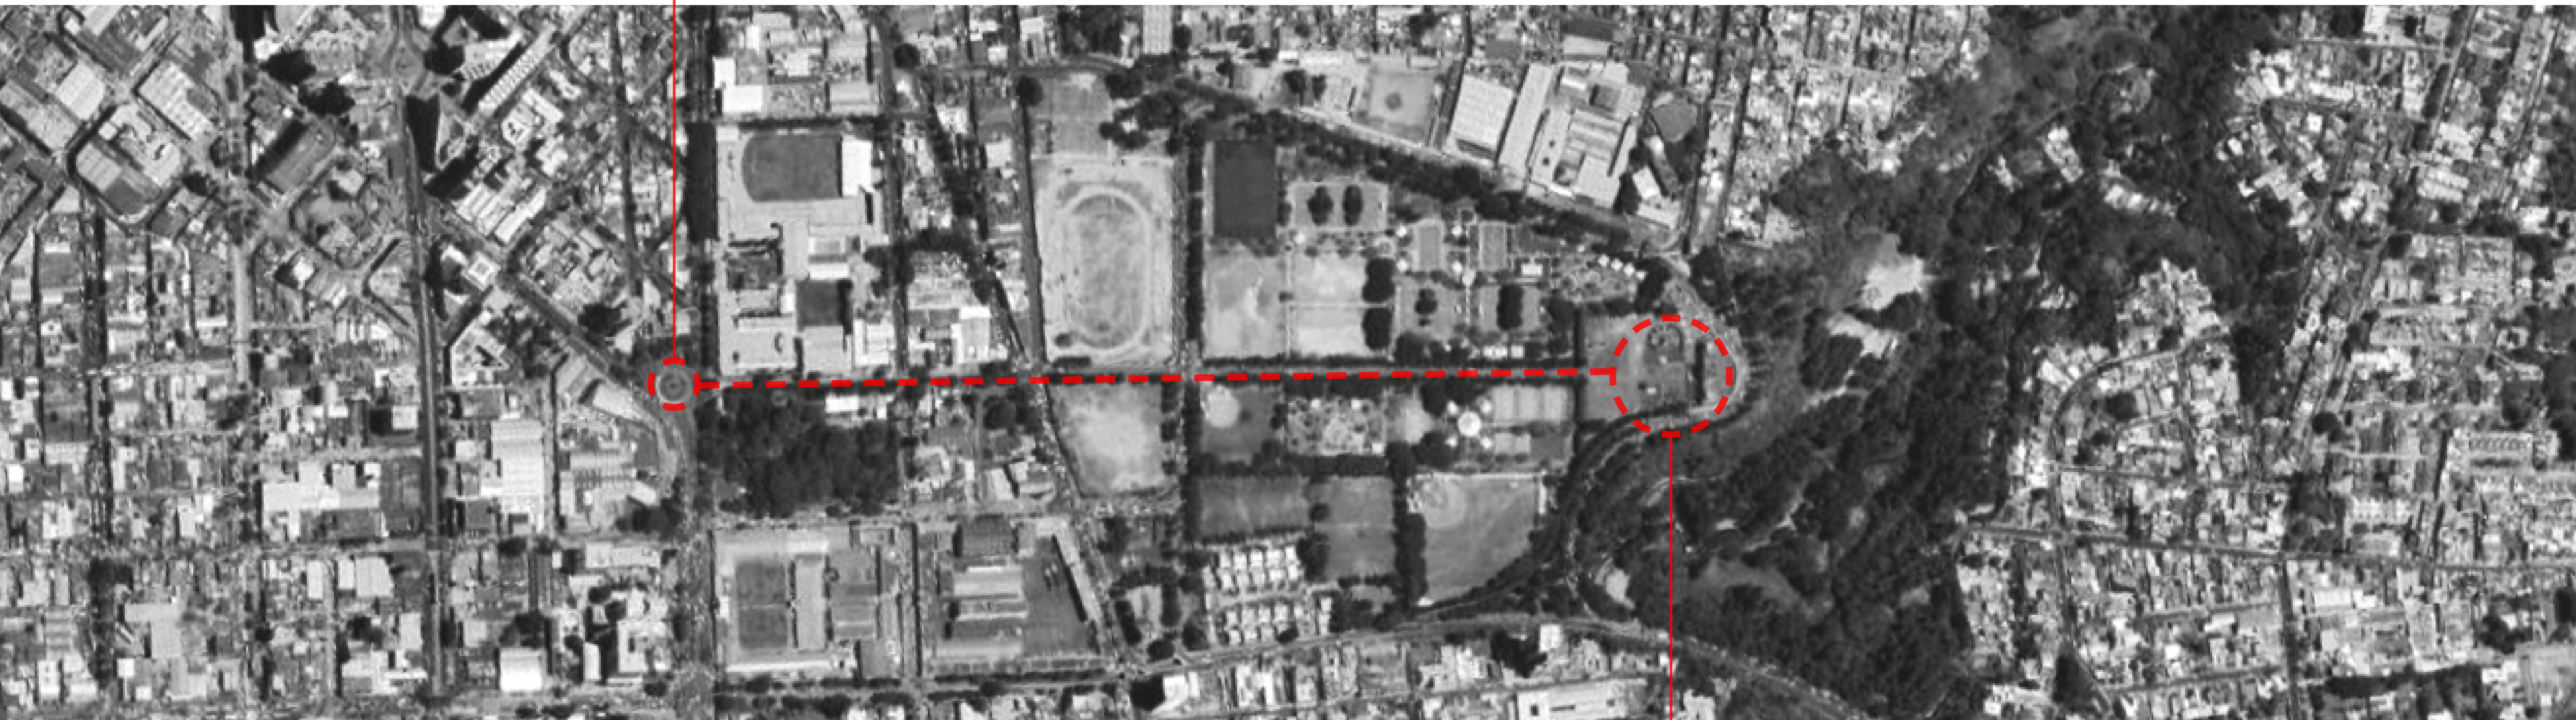

## THE VOLCANO

Guatemala is known for its volcanoes with many 'moods'. They are like eyes, connected to the earth while looking into the sky.

**Monumento de la Estrella**

# SITE

The street, 32 Calle, ties together two significant monuments: Tribuna Militar del Campo Marte and the Monumento de la Estrella. This design will keep the current sightline open to respect the urban context and retain the visual tension bwteen the two points. The south half of the site is dedicated to the new stadium while the north half is planned for furture hospitality and entertainment compound.
