SHERWIN-WILLIAMS

WeatherXL™

Paint and Coating

Liberty and Lumber Metal Supply uses a proven coating and finish for our metal steel panels. WeatherXL™ uses a silicone-modified polyester (SMP) formula, which means stronger protection, more durability, and better metal paint endurance.

LANTOR® CONDENSTOP®
ADVANCED

Overview

Liberty Panels are included within the industry standard roofing and siding panel profiles. This durable, strong, and attractive profile gives you a modern appearance. These panels are used for many post frame roofing and siding applications, residential home projects, agricultural as well as other projects. The Liberty Panel is designed for applications over a 3/12 roof pitch and roof purlins spacings no greater than 3' o.c. The Liberty Panel is also intended to be used for sidewall applications for post frame buildings, interior liners and more.
