

TAKING IMAGES OR VIDEOS OF CHILDREN WHILE PROVIDING EARLY CHILDHOOD EDUCATION AND CARE

Purpose

The National Model Code for Taking Images or Videos of Children while Providing Early Childhood Education and Care (National Model Code) addresses child safe practices for the use of electronic devices while providing early childhood education and care (ECEC). Providers of centre-based ECEC under the National Quality Framework (NQF) are strongly encouraged to adopt the National Model Code as a further support to promote a child safe culture. The National Model Code is a voluntary, interim measure while future legislative reform is being considered by governments.

Scope

This National Model Code has been developed for approved providers and their services, including educators, other staff, and volunteers, while children are being educated and cared for at centre-based early childhood services. While the National Model Code targets centre-based services whose primary purpose is to educate and care for children 0-5 years old under the NQF (long day care and pre-school / kindergarten services), providers of other types of children's education and care services may wish to consider adopting similar practices within their own contexts.

National Model Code

Part 1

Only service-issued electronic devices should be used when taking images or videos of children while providing education and care. The appropriate use of service-issued electronic devices for taking, sending and storing images or videos of children should be clearly outlined in policies and procedures.

Part 2

Personal electronic devices that can take images or videos (such as tablets, phones, digital cameras, and smart watches) and personal storage and file transfer media (such as SD cards, USB drives, hard drives and cloud storage) should not be in the possession of any person while providing education and care and working directly with children. Any exceptions to this should be for limited, essential purposes that are authorised in writing (or through another means if written authorisation is not reasonably practicable) by the approved provider of the service, and where that access does not impede the active supervision of children.

Part 3

Essential purposes for which use and / or possession of a personal electronic device may be authorised for purposes other than taking images or recording videos of children include:

- communication in an emergency situation involving a lost child, injury to child or staff member, or other serious incident, or in the case of a lockdown or evacuation of the service premises
- personal health requirements, e.g. heart or blood sugar level monitoring
- disability, e.g. where a personal electronic device is an essential means of communication for an educator or other staff member
- family necessity, e.g. a worker with an ill or dying family member
- technology failure, e.g. when a temporary outage of service-issued electronic devices has occurred
- local emergency event occurring, to receive emergency notifications through government warning systems, for example, bushfire evacuation text notification.

Part 4

Approved providers and their services should have strict controls in place for the appropriate storage and retention of images and videos of children.

Guidelines

Guidelines have been developed to support approved providers and their services apply the National Model Code in their context(s) and uphold child safe practices when using electronic devices to take images or videos of children.
