
Update from the Kimbrook Manor

March 20, 2020

Thank you to everyone that have been supporting our efforts to protect our Senior Residents. To date we have NO CASES of the COVID-19 virus or other illness in the building.

As we continue to watch this virus spread, and take special note that BC is now the hardest hit province with the highest fatality rate, we have added the following measures to further safe guard against infection.

1. We are implementing strict closure hours effective immediately. The **Kimbrook Manor will be open 7am - 6:00pm**. During these daytime hours caregivers may drop off items to staff now stationed at the entrance to give to residents. **Access will only be given to caregivers that are required to provided essential care to residents**. We ask that these care givers that require special access please self isolate when not at the Manor to protect all residents.
2. **Only emergency services including Interior Health and EMS are permitted to enter** outside these new hours.
3. Designated **staff have permanently relocated to Kimbrook Manor** until the end of April to minimize outside contact and risk of staff transmission.
4. We are asking **all residents to remain within the building** and only leave for essential appoints.

We understand this is a difficult time for residents and family members. We are working to provide provide scheduled FaceTime calls with residents and their families. Anyone interested please message and we will do our best to accommodate all requests.

Thank you for your continued support of our best efforts to keep everyone safe during this trying time. We look forward to this threat being resolved and resuming normal activity as soon as possible.
