

Solar Skid - BMO

The BMO Solar Skids are engineered for optimal efficiency and ease of deployment. Each unit is designed with a prewired electrical box and connections, facilitating straightforward installation in field environments. Our portfolio accommodates both 24 and 48-volt systems, allowing for precise alignment with customer-specific demands for autonomous operational duration and system reliability, with a strong emphasis on customization and technical precision.

BMO is also authorized dealer for many solar components from reputable manufactures
